Packing List

Before you begin operating your PC, please make sure that the following materials are enclosed:

- AHP-2176 Touch Panel PC
- Mounting brackets and screws
- DVD-ROM for manual (in PDF format) and drivers

If any of these items should be missing or damaged, please contact your distributor or sales representative immediately.

Safety & Warranty

1. Read these safety instructions carefully.
2. Keep this user's manual for later reference.
3. Disconnect this equipment from any AC outlet before cleaning. Do not use liquid or spray detergents for cleaning. Use a damp cloth.
4. For pluggable equipment, the power outlet must be installed near the equipment and must be easily accessible.
5. Keep this equipment away from humidity.
6. Put this equipment on a firm surface during installation. Dropping it or letting it fall could cause damage.
7. The openings on the enclosure are for air convection. Protect the equipment from overheating. DO NOT COVER THE OPENINGS.
8. Make sure the voltage of the power source is correct before connecting the equipment to the power outlet.
9. Position the power cord so that people cannot step on it. Do not place anything over the power cord.
10. All cautions and warnings on the equipment should be noted.
11. If the equipment is not used for a long time, disconnect it from the power source to avoid damage by transient over-voltage.
12. Never pour any liquid into an opening. This could cause fire or electrical shock.
13. Never open the equipment. For safety reasons, only qualified service personnel should open the equipment.
14. If any of the following situations arises, get the equipment checked by service personnel:
    a. The power cord or plug is damaged.
    b. Liquid has penetrated into the equipment.
    c. The equipment has been exposed to moisture.

d. The equipment does not work well, or you cannot get it to work according to the user's manual.

e. The equipment has been dropped and damaged.

f. The equipment has obvious signs of breakage.

15. DO NOT LEAVE THIS EQUIPMENT IN AN ENVIRONMENT WHERE THE STORAGE TEMPERATURE IS BELOW -20°C (-4°F) OR ABOVE 60°C (140°F). IT MAY DAMAGE THE EQUIPMENT.

FCC

This device complies with Part 15 FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received including interference that may cause undesired operation.

Caution:
There is a danger of explosion if the battery is incorrectly replaced. Replace only with the same or equivalent type recommended by the manufacturer. Dispose of used batteries according to the manufacturer's instructions and your local government's recycling or disposal directives.

Below Table for China RoHS Requirements

General Information

1.1 Introduction

The AHP-2176 operator panel is an onboard Intel® Celeron® 827E 1.4GHz processor computer that is designed to serve as a human machine interface (HMI). It is a PC-based system with 17" color TFT LCD display, onboard Ethernet controller, multi-COM port interfaces and an audio controller. With a built-in CompactFlash socket, the AHP-2176 is as compact and user friendly as a multi-function computer. In addition, its "fit anywhere" design makes it very flexible and able to be used in many different kinds of installations. It can be Panel / VESA / Wallmounted.

For system integrators, this simple, complete, compact and highly integrated system let you easily build an operator panel into your applications. Common industrial applications include factory automation systems, precision machinery, and production process control. It is also suitable for many non-industrial applications, including vending machine, and car park automation. Our operator panel is a reliable, cost-effective solution to your application's processing requirements.

1.2 Specification

System

● CPU	Onboard Intel® Celeron® 827E 1.4GHz Processor
● System Memory	DDR3 800/1066/1333 MHz (204 pin) x 2, SODIMM, Max. 8GB
● Ethernet	10/100/1000Base-T, RJ-45 x 2
● LCD / CRT Controller	Integrated in Processor
● I/O Port	USB2.0 x 4 (2 on front, 2 on rear) DB-9 RS-232 x 4 (COM3/4/5/6) LAN x 2 VGA x 1 Line-out x 1 Power switch x 1
● Storage Disk Drive	CompactFlash™ slot x 1 (Internal); 2.5” SATA Hard Disk Drive x 1
● Expansion Slot	Mini PCIe Card x 2
● OS Support	Windows® CE, Windows® XP, Windows® XP embedded, Windows® 7, linux kernel 2.6.3 or above

Mechanical

● Construction	IP-65 aluminum die cast front bezel
● Mounting	Panel/ Wall/ VESA 100/ Desktop

- Dimension 16.5”(W) x 14.1”(H) x 2.8”(D) (420mm x 358mm x 97mm)
- Carton Dimension 26”(W) x 8.11”(H) x 19.53”(D) (661mm x 206mm x 496mm)
- Net Weight 17.9 lb (8.1 kg)
- Gross Weight 23.1 lb (10.5 kg)

Environmental

- Operating Temperature -4^{o}F~140^{o}F (-20^{o}C~60^{o}C)
- Storage Temperature -4^{o}F~158^{o}F (-20^{o}C~70^{o}C)
- Operating Humidity 5% to 95%@ 40^{o}C, non-condensing
- Vibration 1 g rms/ 5-500Hz/ Operation (HDD)
- Shock 20 G peak acceleration (11 msec. duration)
- EMC CE/FCC Class A
- Power Supply 9~30V DC input ;
  Over-voltage protection
  Low-voltage protection
  Reverse protection

Power Supply

- DC Input 9~30V DC input ;
  Over-voltage protection
  Low-voltage protection
  Reverse protection

LCD

- Display Type 17” TFT LCD
- Max. Resolution 1280x1024
- Max. Colors 16.7M colors
- Luminance (cd/m^2) HTT : 350
- Viewing Angle HTT: 170^o (H),160^o (V)
- Backlight LED
- Backlight MTBF (Hours) HTT : 50,000

Touch Screen

- Type 5-wire analog resistive
- Resolution 2048x2048
- Light Transmission > 80%
- Lifetime 35 million activations

Hardware Installation

2.1 Panelmount Installation

The display panel can be mounted into the wall. You will need the screws along with the mounting brackets, which be packed in the accessory box. Follow the steps below:

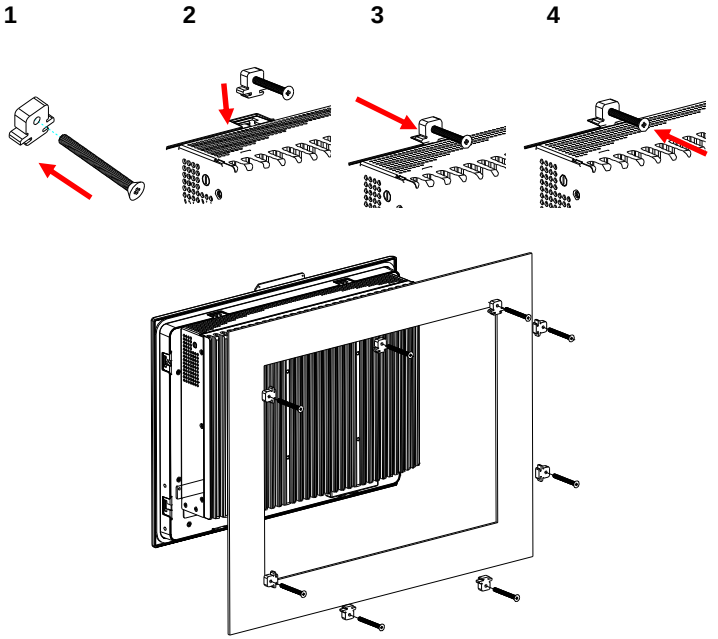
Before you start to follow the instructions, please place the display panel into the wall. See the following illustration on the left.

Step 1: Place the mounting brackets and plug the screw.

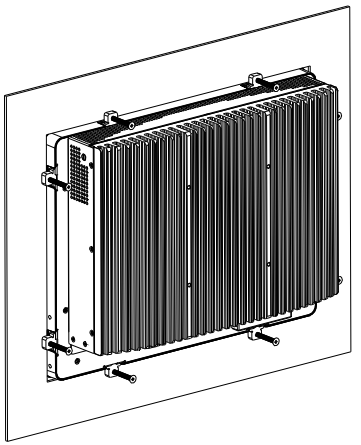
Step 2: Aim the mounting set at the hole on the monitor.

Step 3: Move the mounting set to the narrow gauge and fix it with screws.

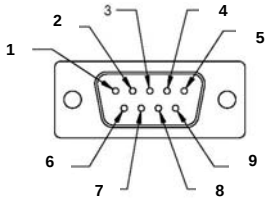
Step 4: You've completed the preliminary when the mounting set is tightened. Next, repeat the steps and tighten all mounting set around the monitor until the monitor is firmly mounting on the wall.



Complete Illustration



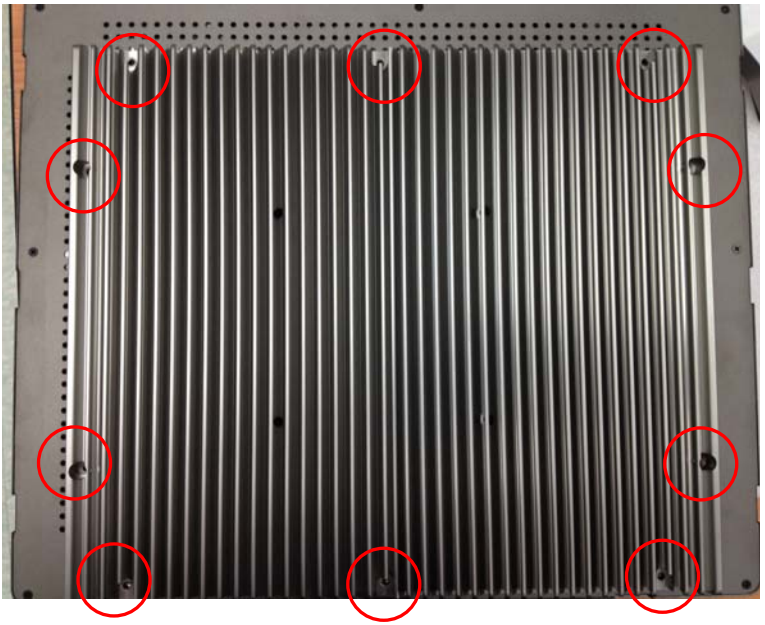
2.2 COM Port Connector



Pin	Signal	Pin	Signal
1	DCD	2	RXD
3	TXD	4	DTR
5	GND	6	DSR
7	RTS	8	CTS
9	RI		

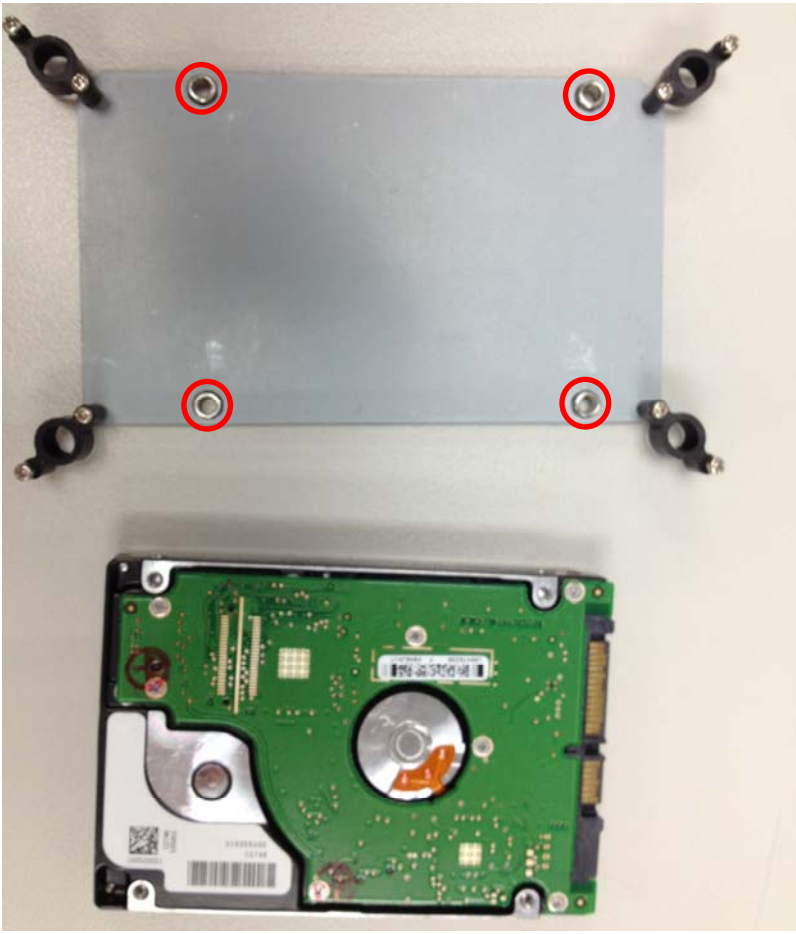
2.3 Hard Disk Drive Installation

Step 1: Unfasten the screws of the heatsink



Step 2: Get the Bracket of Hard Disk Drive from the package

Step 3: Fasten the Hard Disk onto the bracket



Step 4: Fasten the screws of the hard disk bracket onto the AHP-2176

Chapter

3

AMI BIOS Setup

3.1 System Test and Initialization

These routines test and initialize board hardware. If the routines encounter an error during the tests, you will either hear a few short beeps or see an error message on the screen. There are two kinds of errors: fatal and non-fatal. The system can usually continue the boot up sequence with non-fatal errors.

System configuration verification
These routines check the current system configuration stored in the CMOS memory and BIOS NVRAM. If system configuration is not found or system configuration data error is detected, system will load optimized default and re-boot with this default system configuration automatically.

There are four situations in which you will need to setup system configuration:
1. You are starting your system for the first time
2. You have changed the hardware attached to your system
3. The system configuration is reset by Clear-CMOS jumper
4. The CMOS memory has lost power and the configuration information has been erased.

The AHP-2176 CMOS memory has an integral lithium battery backup for data retention. However, you will need to replace the complete unit when it finally runs down.

3.2 AMI BIOS Setup

AMI BIOS ROM has a built-in Setup program that allows users to modify the basic system configuration. This type of information is stored in battery-backed CMOS RAM and BIOS NVRAM so that it retains the Setup information when the power is turned off.

Entering Setup

Power on the computer and press <Del>or <F2> immediately. This will allow you to enter Setup.

Main

Set the date, use tab to switch between date elements.

Advanced

Enable disable boot option for legacy network devices.

Chipset

Host bridge parameters.

Boot

Enables/disable quiet boot option.

Security

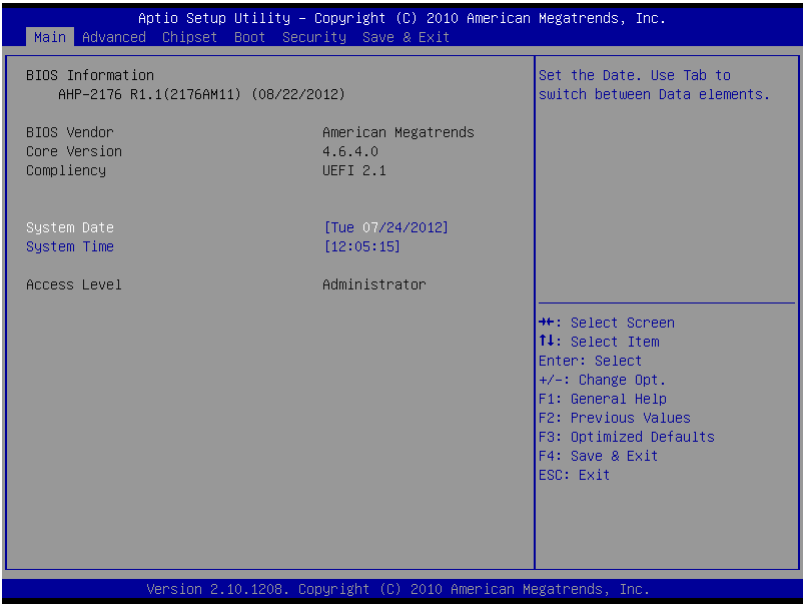
Set setup administrator password.

Save&Exit

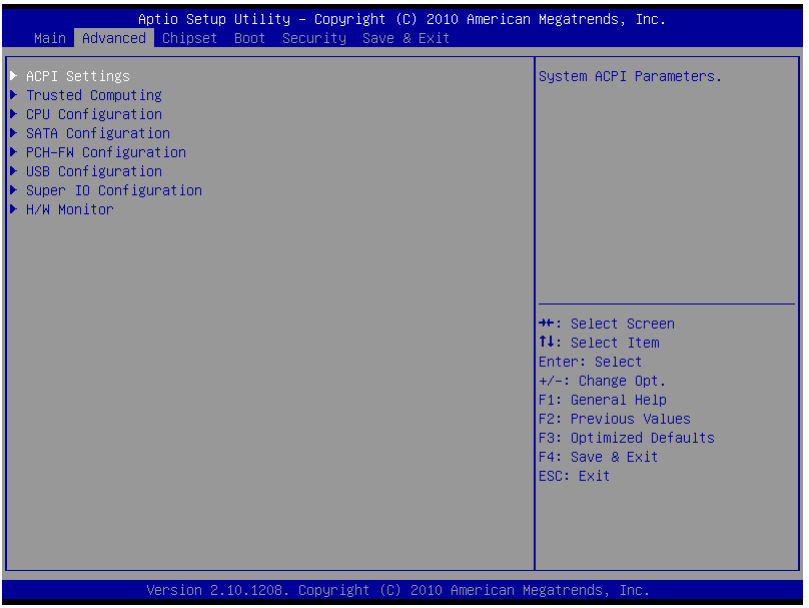
Exit system setup after saving the changes.

Setup Menu

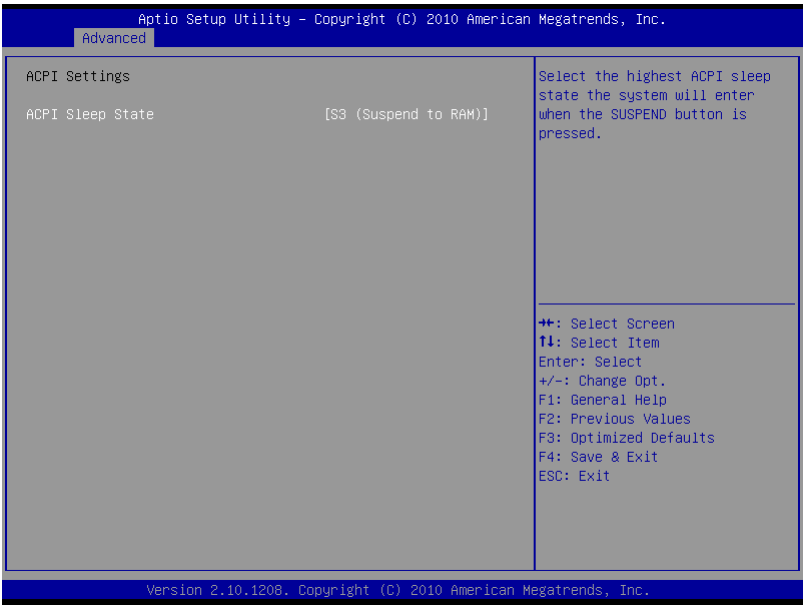
Setup submenu: Main



Setup submenu: Advanced



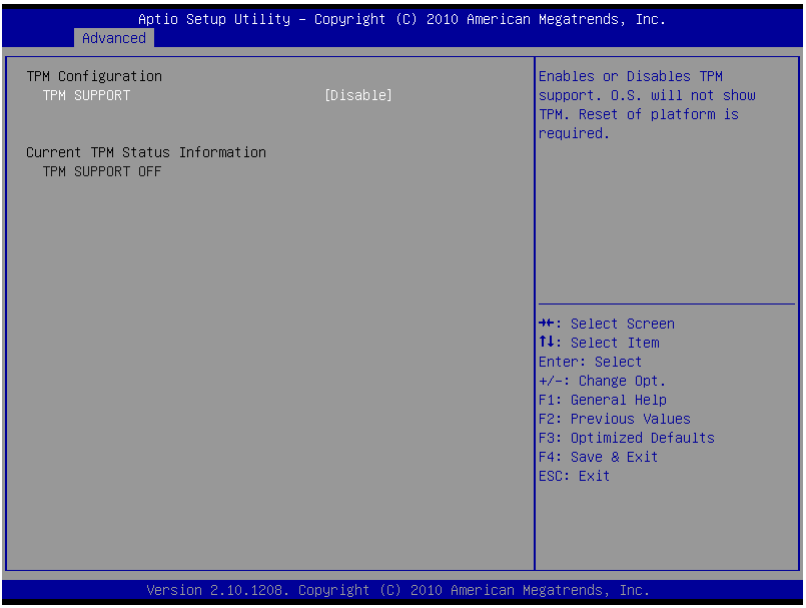
ACPI Settings



Options Summary :

ACPI Sleep State	Suspend Disabled	
	S1 (CPU Stop Clock)	
	S3 (Suspend to RAM)	Default
Select the Highest ACPI sleep state the system will enter when the SUSPEND button is pressed.		

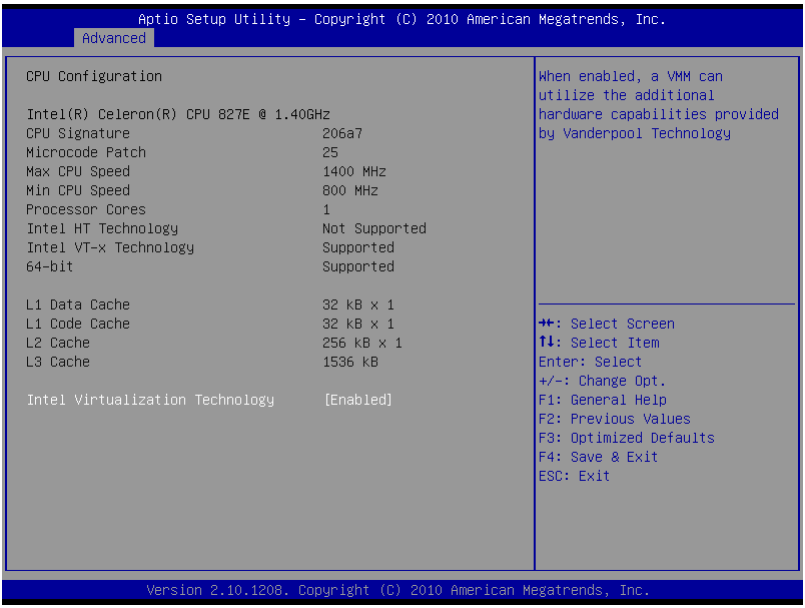
Trusted Computing



Option Summary :

TPM SUPPORT	Disable	Default
	Enable	
Enables or Disables TPM support. O.S. will not show TPM. Reset of platform is required.		

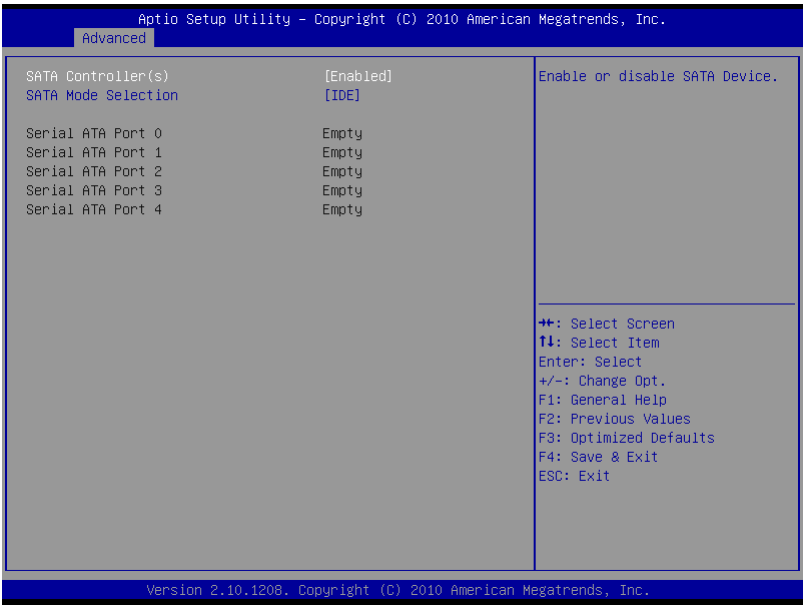
CPU Configuration



Options Summary :

Intel Virtualization Technology	Disabled	
	Enabled	Default
When enabled, a VMM can utilize the additional hardware capabilities provided by Vanderpool Technology		

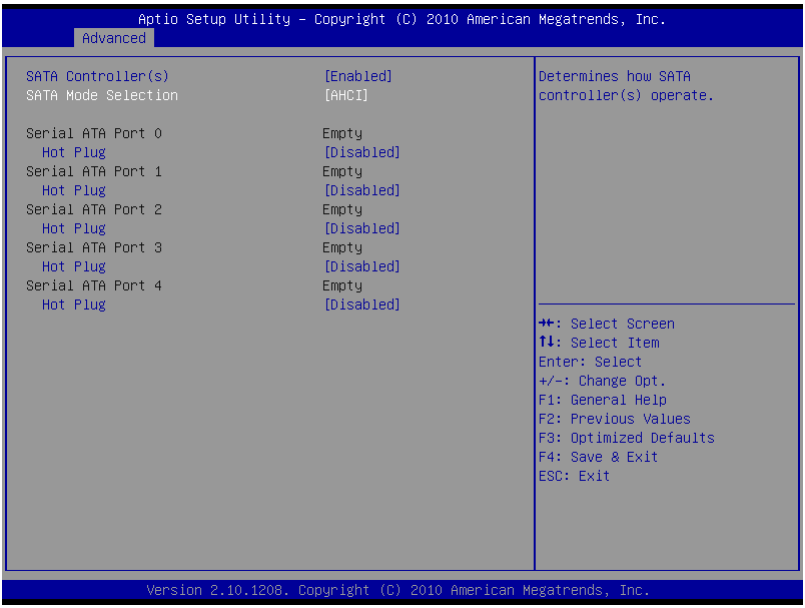
SATA Configuration (IDE)



Options Summary :

SATA Controller(s)	Enabled	Default
	Disabled	
Enable or disable SATA Device.		
SATA Mode Selection	IDE	Default
	AHCI	
	RAID	
Determines how SATA controller(s) operate.		

IDE Configuration (AHCI)

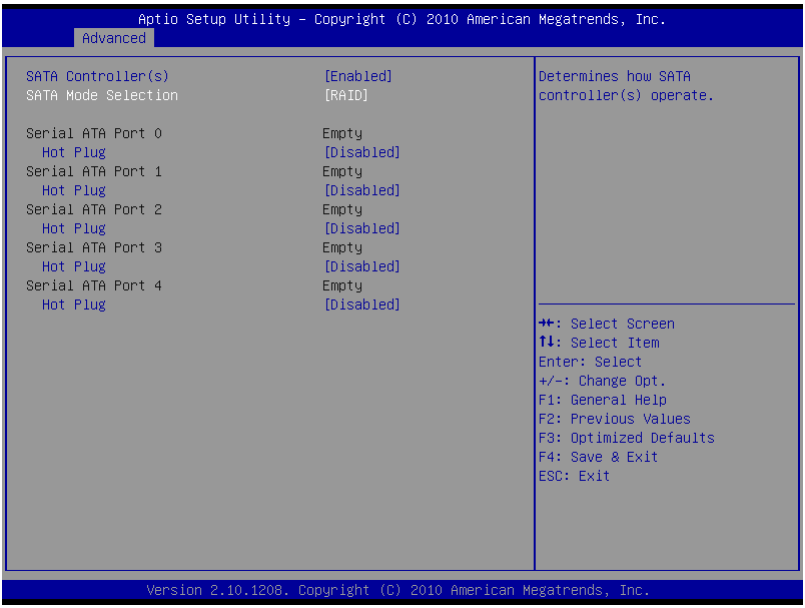


Options Summary :

SATA Controller(s)	Disabled	
	Enabled	Default
Enable or Disable SATA Port.		
SATA Mode Selection	IDE	
	AHCI	Selected
	RAID	
Determines how SATA controller(s) operate.		
SATA Port 0 Hot Plug	Disable	Default
	Enabled	
Designates this port as Hot Pluggable.		
SATA Port 1 Hot Plug	Disable	Default
	Enabled	
Designates this port as Hot Pluggable.		
SATA Port 2 Hot Plug	Disable	Default
	Enabled	
Designates this port as Hot Pluggable.		

SATA Port 3 Hot Plug	Disable	Default
	Enabled	
Designates this port as Hot Pluggable.		
SATA Port 4 Hot Plug	Disable	Default
	Enabled	
Designates this port as Hot Pluggable.		

IDE Configuration (RAID)

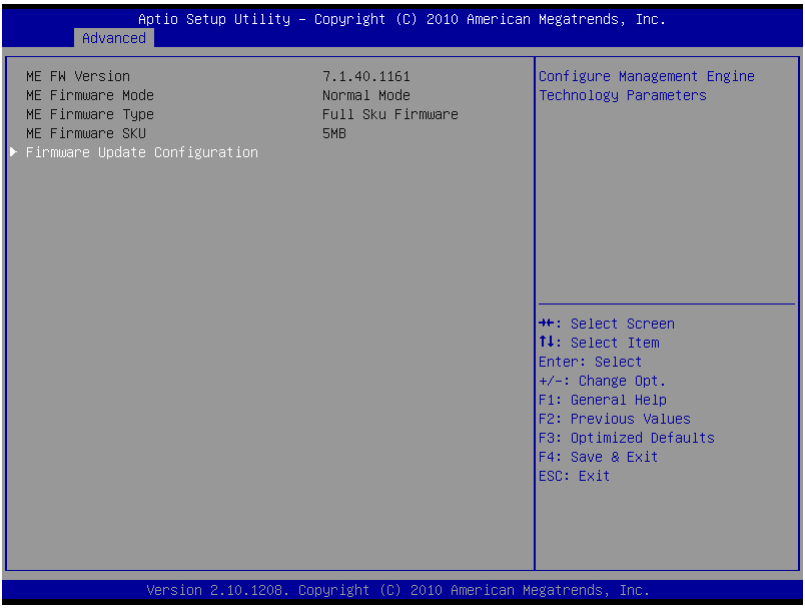


Options Summary :

SATA Controller(s)	Disabled	
	Enabled	Default
Enable or Disable SATA Port.		
SATA Mode	IDE	
	AHCI	
	RAID	Selected
Determines how SATA controller(s) operate.		
SATA Port 0 Hot Plug	Disable	Default
	Enabled	
Designates this port as Hot Pluggable.		
SATA Port 1 Hot Plug	Disable	Default
	Enabled	
Designates this port as Hot Pluggable.		
SATA Port 2 Hot Plug	Disable	Default
	Enabled	
Designates this port as Hot Pluggable.		

SATA Port 3 Hot Plug	Disable	Default
	Enabled	
Designates this port as Hot Pluggable.		
SATA Port 4 Hot Plug	Disable	Default
	Enabled	
Designates this port as Hot Pluggable.		

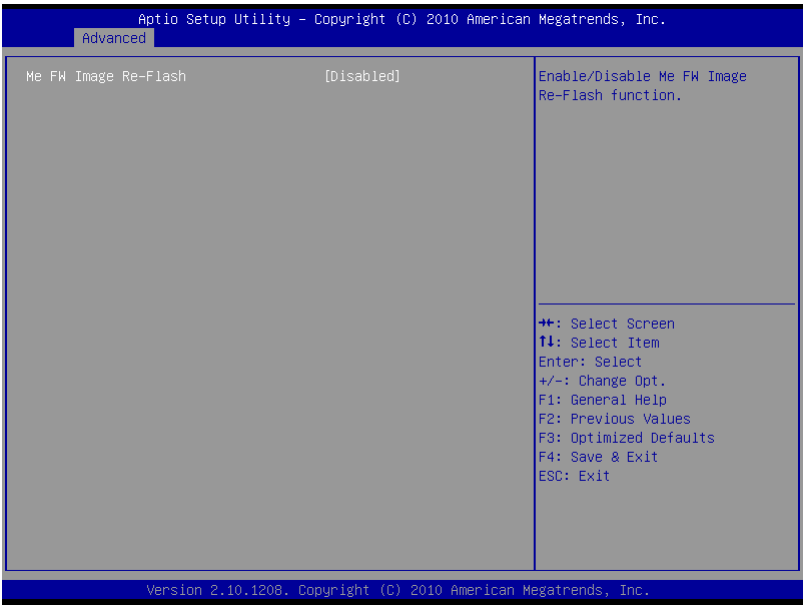
PCH-FW Configuration



Options Summary :

Firmware Update Configuration	Configure Management Engine Technology Parameters.

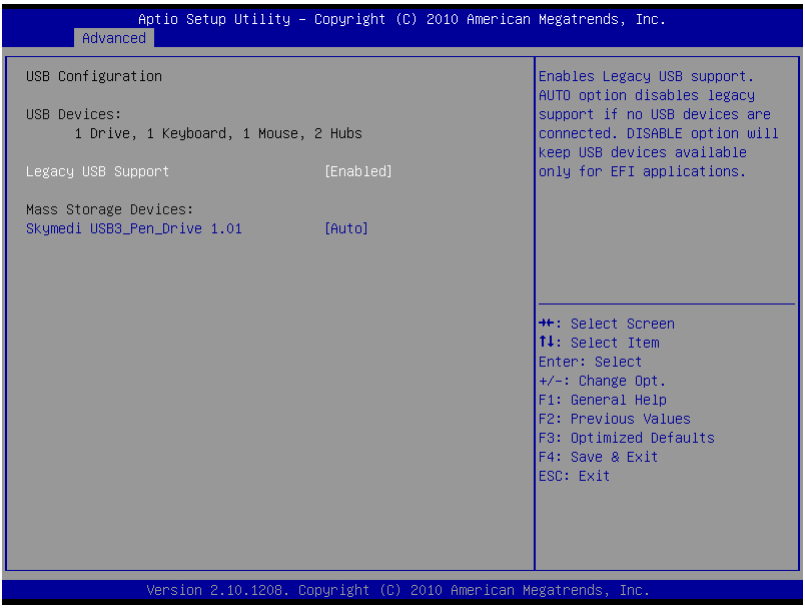
Firmware Update Configuration



Options Summary :

Me FW Image Re-Flash	Disabled	Default
	Enabled	
Enable/Disable Me FW Image Re-Flash function.		

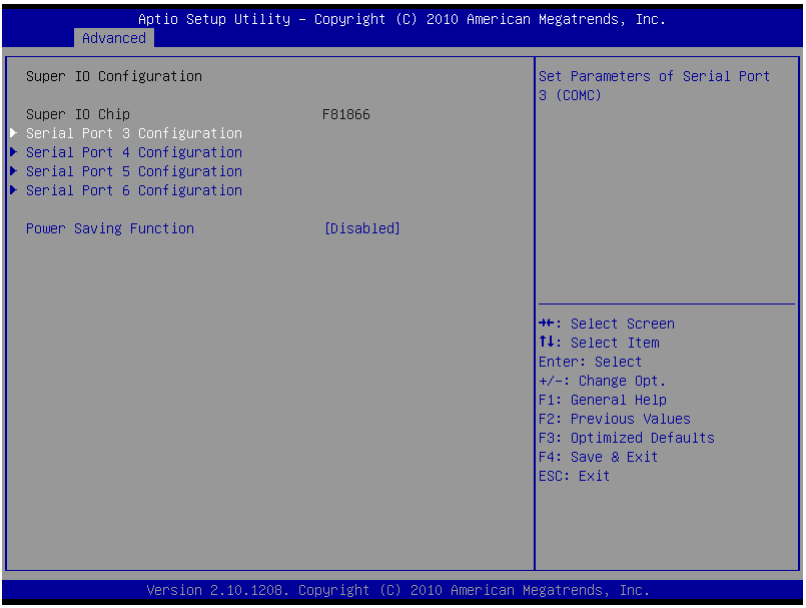
USB Configuration



Options Summary :

Legacy USB Support	Enabled	Default
	Disabled	
	Auto	
Enable Legacy USB support. AUTO option disables legacy support if no USB devices are connected. DISABLE option will keep USB devices available only for EFI applications.		

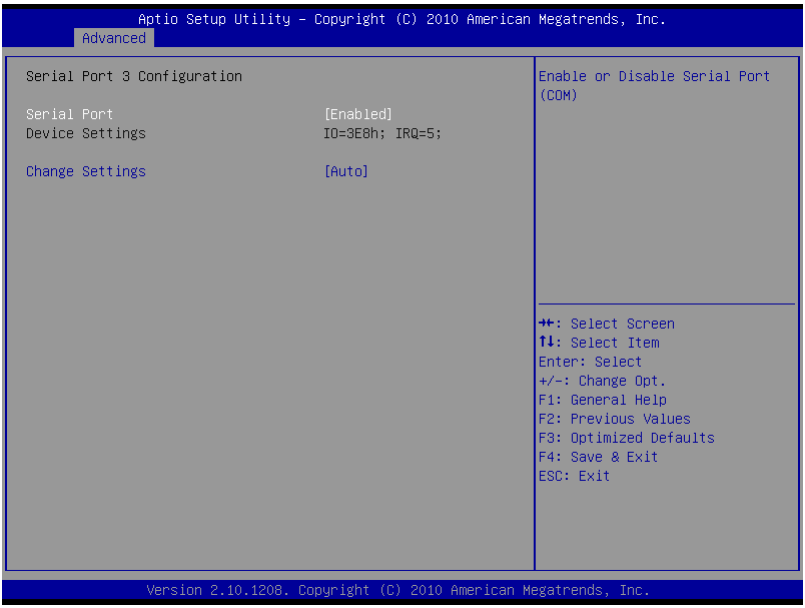
Super IO Configuration



Options Summary :

Serial Port 3 Configuration	Set Parameters of Serial Port 3 (COMC)	
Serial Port 4 Configuration	Set Parameters of Serial Port 4 (COMD)	
Serial Port 5 Configuration	Set Parameters of Serial Port 5 (COME)	
Serial Port 6 Configuration	Set Parameters of Serial Port 6 (COMF)	
Power Saving Function	Disabled	Default
	Enabled	
Enable to reduce power consumption is system off state. When Enabled, only power button can power-up system.		

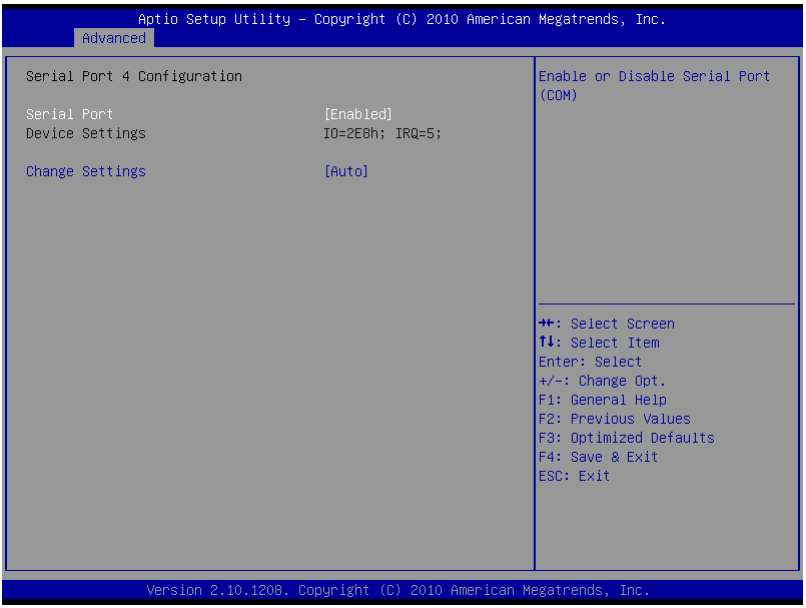
Serial Port 3 Configuration



Options Summary :

Serial Port	Enabled	Default
	Disabled	
Enable or Disable Serial Port (COM)		
Change Settings	Auto	Default
	IO=3E8h; IRQ=5;	
	IO=2E8h; IRQ=5;	
	IO=2D0h; IRQ=5'	
	IO=2D8h; IRQ=5;	
Select an optimal setting for Super IO device.		

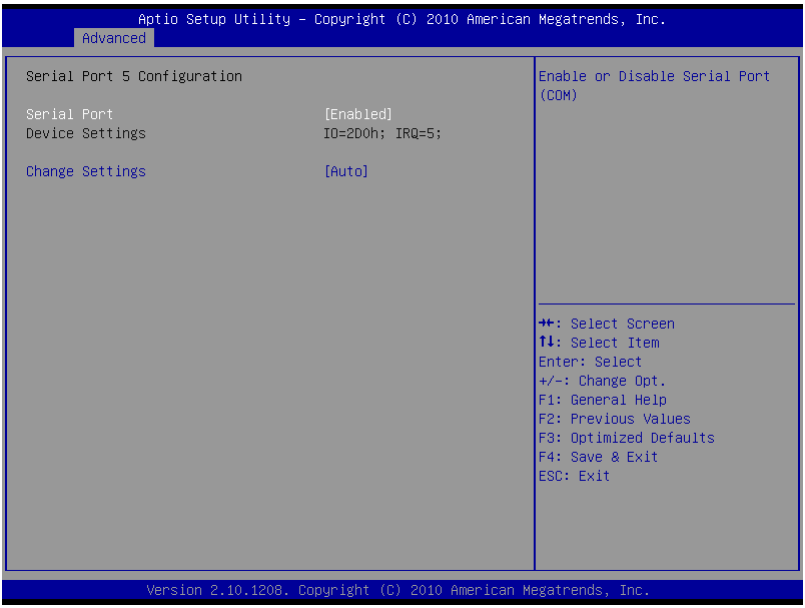
Serial Port 4 Configuration



Options Summary :

Serial Port	Enabled	Default
	Disabled	
Enable or Disable Serial Port (COM)		
Change Settings	Auto	Default
	IO=2E8h; IRQ=5;	
	IO=3E8h; IRQ=5;	
	IO=2D0h; IRQ=5;	
	IO=2D8h; IRQ=5;	
Select an optimal setting for Super IO device.		

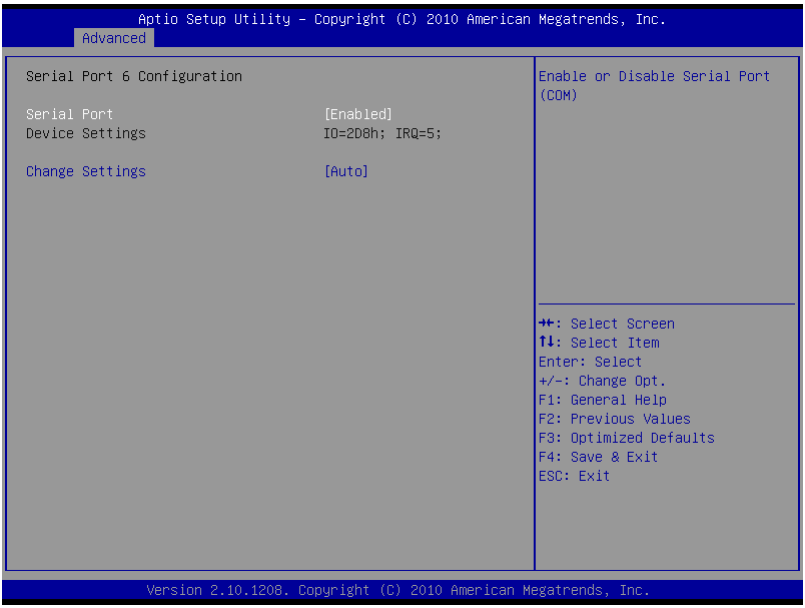
Serial Port 5 Configuration



Options Summary :

Serial Port	Enabled	Default
	Disabled	
Enable or Disable Serial Port (COM)		
Change Settings	Auto	Default
	IO=2D0h; IRQ=5;	
	IO=3E8h; IRQ=5;	
	IO=2E8h; IRQ=5;	
	IO=2D8h; IRQ=5;	
Select an optimal setting for Super IO device.		

Serial Port 6 Configuration



Options Summary :

Serial Port	Enabled	Default
	Disabled	
Enable or Disable Serial Port (COM)		
Change Settings	Auto	Default
	IO=2D8h; IRQ=5	
	IO=3E8h; IRQ=5;	
	IO=2E8h; IRQ=5;	
	IO=2D0h; IRQ=5;	
Select an optimal setting for Super IO device.

Change User/Supervisor Password

You can install a Supervisor password, and if you install a supervisor password, you can then install a user password. A user password does not provide access to many of the features in the Setup utility.

If you highlight these items and press Enter, a dialog box appears which lets you enter a password. You can enter no more than six letters or numbers. Press Enter after you have typed in the password. A second dialog box asks you to retype the password for confirmation. Press Enter after you have retyped it correctly. The password is required at boot time, or when the user enters the Setup utility.

Removing the Password

Highlight this item and type in the current password. At the next dialog box press Enter to disable password protection.

Driver Installation

.

The AHP-2176 comes with an AutoRun DVD-ROM that contains all drivers and utilities that can help you to install the driver automatically.

Insert the driver DVD, the driver DVD-title will auto start and show the installation guide. If not, please follow the sequence below to install the drivers.

Follow the sequence below to install the drivers:

Step 1 – Install Chipset Driver

Step 2 – Install VGA Driver

Step 3 – Install Audio Driver

Step 4 – Install LAN Driver

Step 5 – Install ME Driver

Step 6 – Install TPM Driver

Step 7 – Install Touch Panel Driver

Step 8 – Install Serial Port Driver (Optional)

Note: If you got compatible issue for COM port, please find its driver under STEP 8 folder and then install it by administrative login permission.

Please read instructions below for further detailed installations.

4.1 Installation:

Insert the AHP-2176 DVD-ROM into the DVD-ROM drive. And install the drivers from Step 1 to Step 8 in order.

Step 1 – Install Chipset Driver

1. Click on the ***STEP 1-CHIPSET*** folder and double click on the ***infinst_autol.exe*** file
2. Follow the instructions that the window shows
3. The system will help you install the driver automatically

Step 2 – Install VGA Driver

1. Click on the ***STEP2-VGA*** folder and select the OS folder your system is
2. Double click on the ***.exe*** file located in each OS folder
3. Follow the instructions that the window shows
4. The system will help you install the driver automatically

Note 1:

- This motherboard supports VGA and LVDS display devices. In Single Display mode, use the hot keys to switch between VGA to LVDS device or vice versa. By default, press **<Ctrl>+<Alt>+<F1>** to switch to VGA device and press **<Ctrl>+<Alt>+<F3>** to switch to LVDS device.
- Before removing the current display device, connect the display device that you want to use, and then press the hot keys to switch to that device.

Note 2: If the OS is Windows® XP, you have to install the driver of dotNet Framework first. Simply click on ***dotnetfx35.exe*** located in

dotNet Framwork folder.

Step 3 –Install Audio Driver

1. Click on the ***STEP3-AUDIO*** folder and select the OS folder your system is
2. Double click on the ***.exe*** located in each OS folder
3. Follow the instructions that the window shows
4. The system will help you install the driver automatically

Step 4 –Install LAN Driver

1. Click on the ***STEP4-LAN*** folder and select the folder of ***intel_82579*** or ***realtek_8111E*** based on the LAN chipset in your system.
2. Select the OS folder your system is located in the chipset folder, then double click on ***.exe*** file located in each OS folder
3. Follow the instructions that the window shows
4. The system will help you install the driver automatically

Step 5 – Install ME Driver

1. Click on the ***STEP5-ME*** folder and double click on the ***setup.exe*** file
2. Follow the instructions that the window shows
3. The system will help you install the driver automatically

Step 6 – Install TPM Driver

1. Click on the ***STEP6-TPM*** folder and double click on the ***Setup.exe*** file
2. Follow the instructions that the window shows
3. The system will help you install the driver automatically

Step 7 – Install Touch Panel Driver

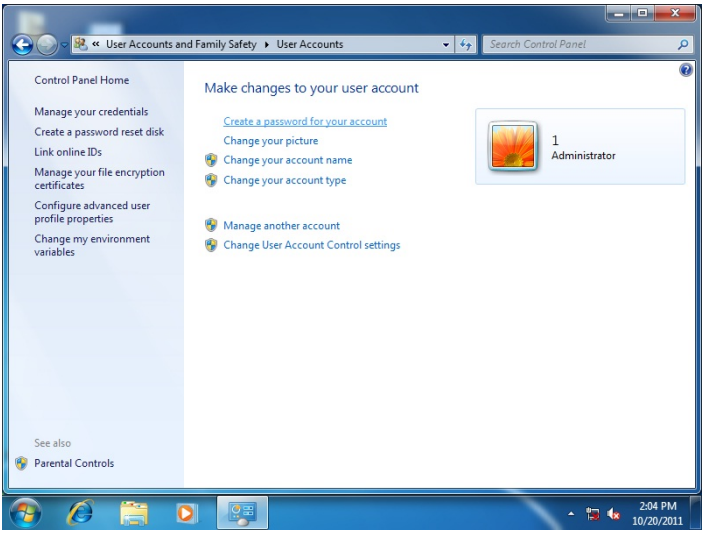
1. Click on the ***STEP7-Touch Panel Driver*** folder and select the OS folder your system is
2. Double click on the ***setup.exe*** file located in each OS folder
3. Follow the instructions that the window shows
4. The system will help you install the driver automatically

Step 8 –Install Serial Port Driver (Optional)

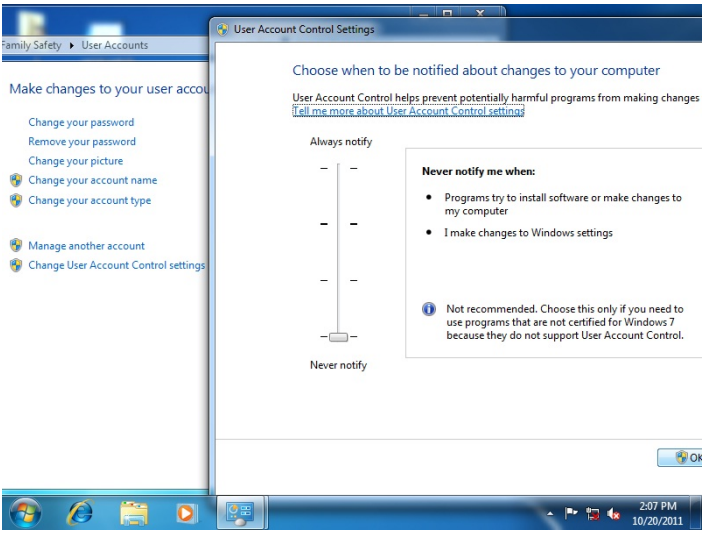
For Windows® XP 32-bit, select the folder of ***WINXP_32*** and double click on the ***patch.bat***

For Windows® 7, please refer to the installation procedures below.

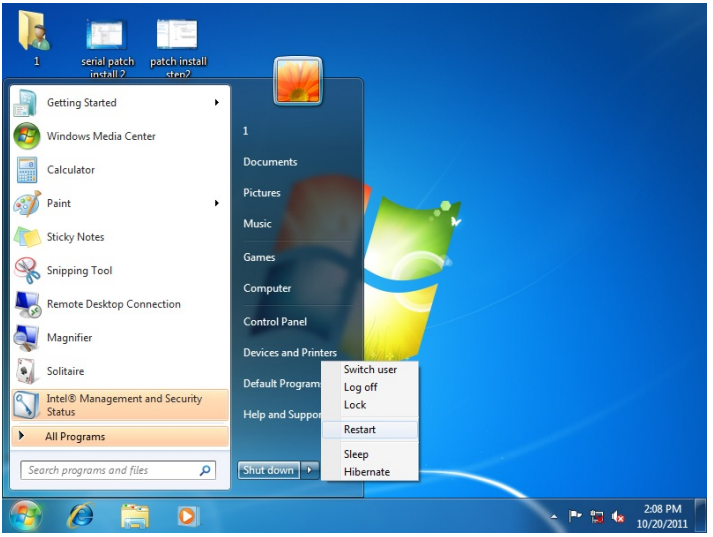
1. Create a password for Administrator account.



2. Change User Account Control Settings to [Never notify]



3. Reboot and Administrator login.



4. To run patch.bat with [Run as administrator].
