All Rights Reserved.

The information in this document is subject to change without prior notice in order to improve the reliability, design and function. It does not represent a commitment on the part of the manufacturer.

Under no circumstances will the manufacturer be liable for any direct, indirect, special, incidental, or consequential damages arising from the use or inability to use the product or documentation, even if advised of the possibility of such damages.

This document contains proprietary information protected by copyright. All rights are reserved. No part of this manual may be reproduced by any mechanical, electronic, or other means in any form without prior written permission of the manufacturer.

Declaration of Conformity

CE

The CE symbol on your product indicates that it is in compliance with the directives of the Union European (EU). A Certificate of Compliance is available by contacting Technical Support.

This product has passed the CE test for environmental specifications when shielded cables are used for external wiring. We recommend the use of shielded cables. This kind of cable is available from ARBOR. Please contact your local supplier for ordering information.

This product has passed the CE test for environmental specifications. Test conditions for passing included the equipment being operated within an industrial enclosure. In order to protect the product from being damaged by ESD (Electrostatic Discharge) and EMI leakage, we strongly recommend the use of CE-compliant industrial enclosure products.

Warning

This is a class A product. In a domestic environment this product may cause radio interference in which case the user may be required to take adequate measures.

FCC Class A

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

NOTE:

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

RoHS

ARBOR Technology Corp. certifies that all components in its products are in compliance and conform to the European Union's Restriction of Use of Hazardous Substances in Electrical and Electronic Equipment (RoHS) Directive 2002/95/EC.

The above mentioned directive was published on 2/13/2003. The main purpose of the directive is to prohibit the use of lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyls (PBB), and polybrominated diphenyl ethers (PBDE) in electrical and electronic products. Member states of the EU are to enforce by 7/1/2006.

ARBOR Technology Corp. hereby states that the listed products do not contain unintentional additions of lead, mercury, hex chrome, PBB or PBDB that exceed a maximum concentration value of 0.1% by weight or for cadmium exceed 0.01% by weight, per homogenous material. Homogenous material is defined as a substance or mixture of substances with uniform composition (such as solders, resins, plating, etc.). Lead-free solder is used for all terminations (Sn(96-96.5%), Ag(3.0-3.5%) and Cu(0.5%)).

SVHC / REACH

To minimize the environmental impact and take more responsibility to the earth we live, Arbor hereby confirms all products comply with the restriction of SVHC (Substances of Very High Concern) in (EC) 1907/2006 (REACH --Registration, Evaluation, Authorization, and Restriction of Chemicals) regulated by the European Union.

All substances listed in SVHC < 0.1 % by weight (1000 ppm)

Warning

Single Board Computers and their components contain very delicate Integrated Circuits (IC). To protect the Single Board Computer and its components against damage from static electricity, you should always follow the following precautions when handling it :

1. Disconnect your Single Board Computer from the power source when you want to work on the inside.
2. Hold the board by the edges and try not to touch the IC chips, leads or circuitry.
3. Use a grounded wrist strap when handling computer components.
4. Place components on a grounded antistatic pad or on the bag that comes with the Single Board Computer, whenever components are separated from the system.

Replacing the Lithium Battery

Incorrect replacement of the lithium battery may lead to a risk of explosion.

The lithium battery must be replaced with an identical battery or a battery type recommended by the manufacturer.

Do not throw lithium batteries into the trash-can. It must be disposed of in accordance with local regulations concerning special waste.

Technical Support

If you have any technical difficulties, please consult the user's manual first at: <ftp://ftp.arbor.com.tw/pub/manual>

Please do not hesitate to call or e-mail our customer service when you still cannot find out the answer.

Warranty

This product is warranted to be in good working order for a period of two years from the date of purchase. Should this product fail to be in good working order at any time during this period, we will, at our option, replace or repair it at no additional charge except as set forth in the following terms. This warranty does not apply to products damaged by misuse, modifications, accident or disaster.

Vendor assumes no liability for any damages, lost profits, lost savings or any other incidental or consequential damage resulting from the use, misuse of, or inability to use this product. Vendor will not be liable for any claim made by any other related party.

Vendors disclaim all other warranties, either expressed or implied, including but not limited to implied warranties of merchantability and fitness for a particular purpose, with respect to the hardware, the accompanying product's manual(s) and written materials, and any accompanying hardware. This limited warranty gives you specific legal rights.

Return authorization must be obtained from the vendor before returned merchandise will be accepted. Authorization can be obtained by calling or faxing the vendor and requesting a Return Merchandise Authorization (RMA) number. Returned goods should always be accompanied by a clear problem description.

Chapter 1

Introduction

1.1 The Product

The EmETXe-i87M0 is a space-conscious CPU board of 125 mm x 95 mm to take up only small footprint in your system. By the architecture of Type 6, the board has two high-performance connectors to promise stable data passing rate. The soldered onboard Intel® 4th Generation Core™ processor, along with integrated Intel® HD Graphics Gen 7.5 graphics chipset, bring Analog RGB, LVDS and DDI solution for most CRT monitors or LCD video panels.

For system configuration, the board is supported by AMI UEFI BIOS. EmETXe-i87M0 is an ideal choice for some demanding industrial control and data communications by its significant processing performance, low power consumption and these features:

- Soldered onboard Intel® 4th Generation Core™ processor
- Integrated Gigabit Ethernet
- Dual-channel 24-bit LVDS, analog RGB, and 3 x DDI ports
- Supports 3 independent displays
- RAID 0, 1, 5, 10 supported
- Support Intel® Active Management Technology (Intel AMT)
- Extended Operating Temp.: -20 ~ 70°C

1.2 About This Manual

This user's manual provides general information and installation instructions about the product. This user's manual is intended for experienced users and integrators with hardware knowledge of personal computers. If you are not sure about any description in this booklet. Please consult your vendor before further handling.

1.3 Specifications

System	
CPU	Intel® 4th Generation Core™ i5 4402E 1.6GHz processor
Memory	2 x DDR3L SO-DIMM sockets, supporting up to 16GB SDRAM
Chipset	Intel® PCH QM87
BIOS	AMI® UEFI BIOS
Watchdog Timer	1~255 levels reset
I/O	
USB Port	12 x USB ports: - 8 x USB 2.0 ports - 4 x USB 3.0 ports
Digital I/O	8-bit programmable Digital Input/Output
Storage	4 x serial ATA ports: - 2 ports with 600MB/s HDD transfer rate - 2 ports with 300MB/s HDD transfer rate
	SATA RAID 0, 1, 5, 10 supported
Expansion Bus	1 x PCIe x16 Gen3 lanes
	8 x PCIe x1 Gen2 lanes
Ethernet Chipset	1 x Intel® I217 PCIe GbE PHY
Audio	HD Audio link
Display	
Graphics Chipset	Integrated Intel® HD Graphics Gen 7.5
Graphics Interface	Analog RGB supports up to 1920x1200@60Hz
	LCD: Dual Channels 24-bit LVDS up to 1920 x 1200 @60Hz
	3 x DDI port
Mechanical & Environmental	
Power Requirement	+12V

Power Consumption	2.07A @+12V (with 37W, B0 ES sample)
Operating Temp.	-20 ~ 70°C (-4 ~ 158°F)
Operating Humidity	10 ~ 95% @ 60°C (non-condensing)
Dimension (L x W)	125 x 95 mm (4.9" x 3.7")

1.4 Inside the Package

Before you begin installing your single board, please make sure that the following materials have been shipped:

1 x EmETXe-i87M0 COM Express CPU Module

1 x Driver CD
1 x Quick Installation Guide

If any of the above items is damaged or missing, contact your vendor immediately.

1.5 Ordering Information

EmETXe-i87M0-4402E	Intel® 4th Generation Core™ i5-4402E/ QM87 COM Express CPU module
--------------------	---

1.5.1 Optional Accessories

HS-87M0-F1	Heat spreader (125x95x18mm)
HS-87M0-F2	Heat spreader (95x95x11mm)
HS-0000-W4	Universal evaluation heat sink kit w/ thermal pad (Dimensions: 125x95x22mm, only used on a flat-type heat spreader)
PBE-1702	COM Express type 6 evaluation carrier board (ATX form factor)
CBK-04-1702-00	Cable Kit <ul style="list-style-type: none">• 1 x SATA cable• 2 x COM port cables• 1 x USB cable

1.6 The Installation Paths of CD Driver

The CPU module supports Windows 7 and 8. Find the necessary drivers on the CD that comes with your purchase. For different OS, the driver installation may vary slightly, but generally they are similar. **DO** install **Chipset**→**Graphic**→**Audio** before the rest to prevent errors.

Find the drivers on CD by the following paths:

Windows 8

Chapter 2

Board Overview

2.1 What Is “COM Express®”?

With more and more demands on small and embedded industrial boards, a multi-functional COM (Computer-on-Module) surfaces as a great solution.

COM Express® supports seven pin-out types applying to Basic and Extended form factors:

Module Type 1 and 10 support single connector with two rows (220 pins).

Module Type 2, 3, 4, 5 and 6 support two connectors with four rows (440 pins).

EmETXe-i87M0 is a Type-6 module.

Difference between Standard Type 6 and EmETXe-i87M0 is listed as below:

Module Type	Standard Type 6	EmETXe-i87M0
Connectors	2	2
Connector Rows	A, B, C, D	A, B, C, D
PCIe Lanes (Max)	24	24
LAN (Max)	1	1
Serial Ports (Max)	2	0
Digital Display I/F (Max)	3	3
USB 3.0 Ports (Max)	4	4

Row AB provides pins for PCI Express, SATA, LVDS, LCD channel, LPC bus, system and power management, VGA, LAN, and power and ground interfaces.

Row CD provides SDVO and legacy PCI and IDE signals next to additional PCI Express, LAN and power and ground signals. The COM are targeted at following applications:

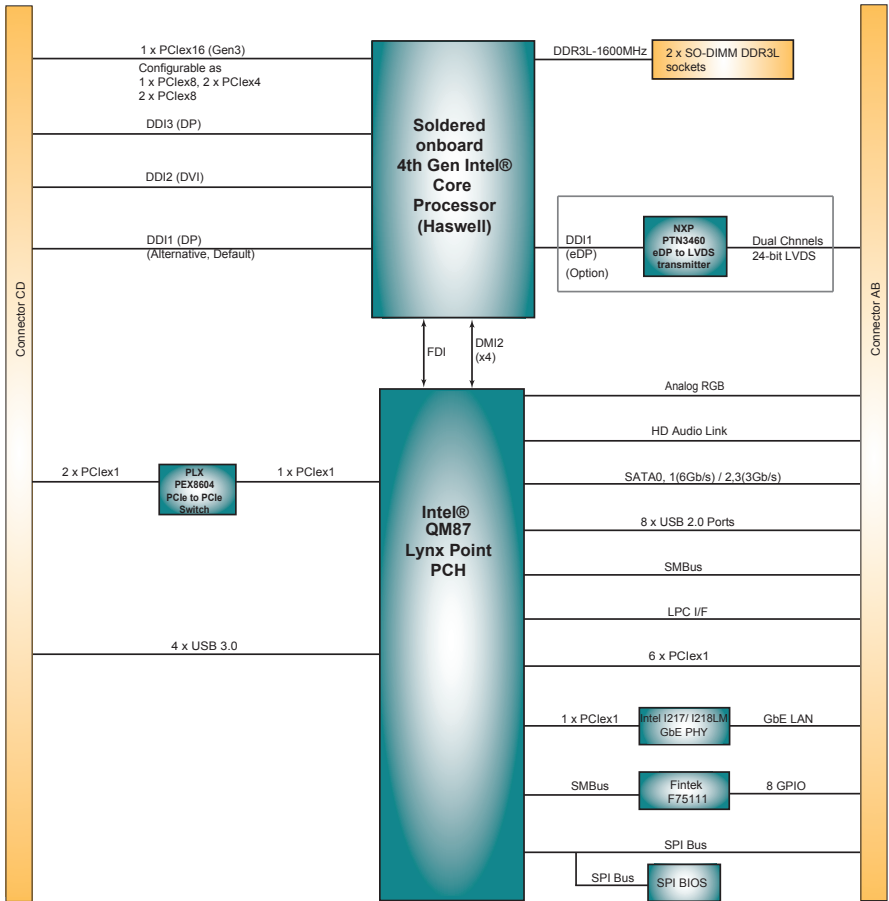

- Retail & Advertising
- Medical
- Test & Measurement
- Gaming & Entertainment
- Industrial & Automation
- Military & Government
- Security

2.2 Board Dimensions

The following illustration shows the dimension of EmETXe-i87M0, with the measurements in width, depth, and height called out.

2.3 Block Diagram

2.4 Connector Pin Definition

Being a most commonly-used Type 6, the EmETXe-i87M0 features two board-to-board connectors on bottom side.

Chapter 3

Installation & Maintenance

3.1 Installing the CPU Module on Carrier Board

1. Find the COM Express connectors on carrier board PBE-1702, which is available in [Section 1.5.1 Optional Accessories on page 4.](#)
2. Embed EmETXe-i87M0 into PBE-1702 via COM Express connectors as below; that is, COM Express AB to AB and CD to CD.

3.2 Installing the Heatsink

1. Locate EmETXe-i87M0 mounted on PBE-1702.
2. Prepare the heatspred included in optional accessories. (See Section [1.5.1 Optional Accessories on page 4](#)) Put heatspred on the CPU module and lock it. Make sure thermal grease in contact with CPU and chipset on CPU module. Plug power cable into appropriate connector if there is a fan.

This page is intentionally left blank.

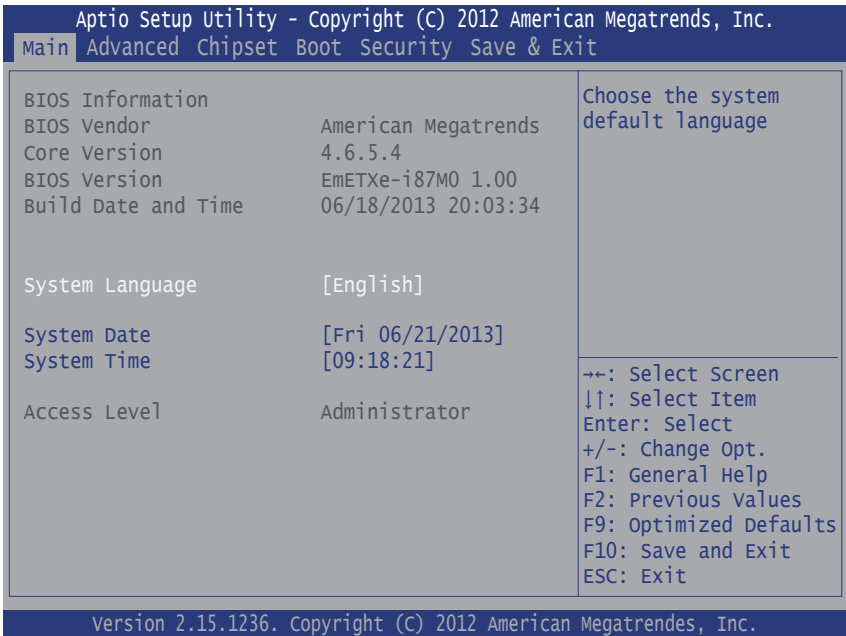

Chapter 4

BIOS

4.1 Main

The AMI BIOS provides a Setup utility program for specifying the system configurations and settings. The BIOS RAM of the system stores the Setup utility and configurations. When you turn on the computer, the AMI BIOS is immediately activated. To enter the BIOS SETUP UTILITY, press “Delete” once the power is turned on. When the computer is shut down, the battery on the motherboard supplies the power for BIOS RAM.

The **Main Setup** screen lists the following information:

Setting	Description
System Language	Choose the system default language.
System Date	Set the system date. Use Tab to switch between Data elements. Note that the ‘Day’ automatically changes when you set the date. ► The date format is: Day: Sun to Sat Month: 1 to 12 Date: 1 to 31 Year: 1998 to 2099

System Time	<p>Set the system time. Use Tab to switch between Time elements.</p> <p>▶ The time format is: Hour: 00 to 23 Minute: 00 to 59 Second: 00 to 59</p>
-------------	---

Key Commands

BIOS Setup Utility is mainly a key-based navigation interface. Please refer to the following key command instructions for navigation process.

Keystroke	Function
◀ ▶	Move to highlight a particular configuration screen from the top menu bar / Move to highlight items on the screen
▼ ▲	Move to highlight previous/next item
Enter	Select and access a setup item/field
Esc	On the Main Menu – Quit the setup and not save changes into CMOS (a message screen will display and ask you to select “OK” or “Cancel” for exiting and discarding changes. Use “←” and “→” to select and press “Enter” to confirm) On the Sub Menu – Exit current page and return to main menu
Page Up / +	Increase the numeric value on a selected setup item / make change
Page Down -	Decrease the numeric value on a selected setup item / make change
F1	Activate “General Help” screen
F0	Save the changes that have been made in the setup and exit. (a message screen will display and ask you to select “OK” or “Cancel” for exiting and saving changes. Use “←” and “→” to select and press “Enter” to confirm)

4.2 Advanced

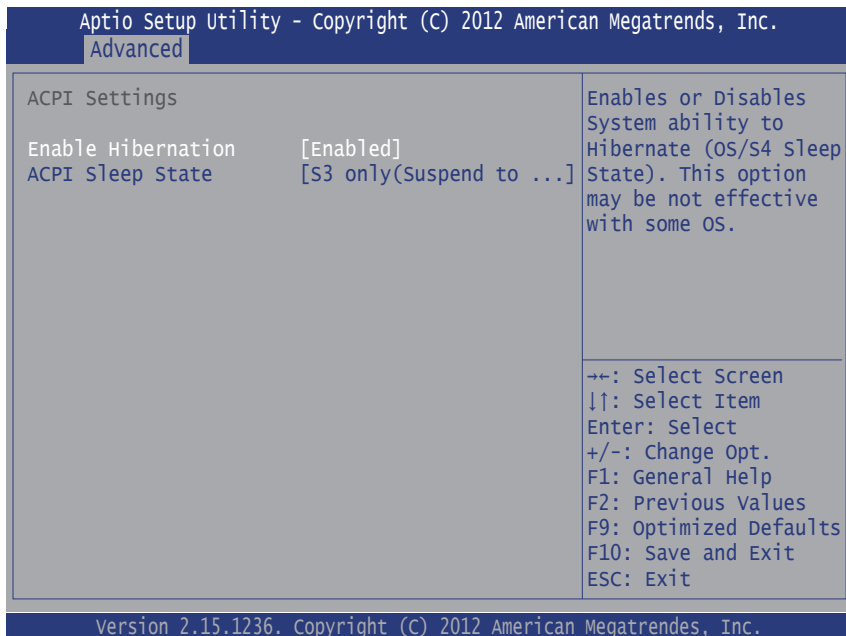

The “Advanced” setting page provides you the options to configure the details of your hardware, such as ACPI, CPU, SATA, AMT, USB and Super IO.

Setting	Description
Launch PXE OpROM	Controls the execution of PXE OpROM. ▶ Options: Enabled or Disabled (default)
Launch Storage OpROM	Controls the execution of Storage OpROM. ▶ Options: Enabled or Disabled (default)
ACPI Settings	See Section 4.2.1 ACPI Settings on page 23
CPU Configuration	See Section 4.2.2 CPU Configuration on page 24
SATA Configuration	See Section 4.2.3 SATA Configuration on page 25
AMT Configuration	See Section 4.2.4 AMT Configuration on page 26
USB Configuration	See Section 4.2.5 USB Configuration on page 27

H/W Monitor	See Section 4.2.6 H/W Monitor on page 28
Super IO Configuration	See Section 4.2.7 Super IO Configuration on page 29
Intel(R) Ethernet Network Connect	See Section 4.2.8 Intel(R) Ethernet Network Connect on page 31

4.2.1 ACPI Settings

Setting	Description
Enable Hibernation	Enables (default) or Disables System ability to Hibernates (OS/S4 Sleep State). This option may be not effective with some OS.
ACPI Sleep State	Select ACPI sleep state the system will enter when the SUSPEND button is pressed. <ul style="list-style-type: none"> Options: Suspend Disabled, S1 only(CPU Stop Clock), S3 only(Suspend to RAM) (default), Both S1 and S3 available for OS to choose from

4.2.2 CPU Configuration

Aptio Setup Utility - Copyright (C) 2012 American Megatrends, Inc.

Advanced

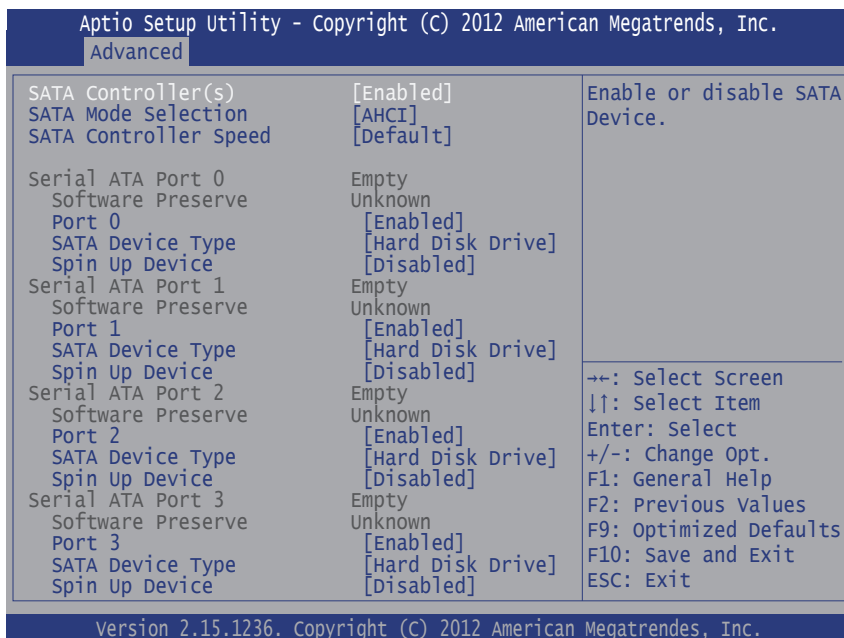

CPU Configuration		Enabled for windows XP and Linux (OS optimized for Hyper-Threading Technology) and Disabled for other OS (OS not optimized for Hyper-Threading Technology). when Disabled only one thread per enabled core is enabled. --: Select Screen >: Select Item Enter: Select +/-: Change Opt. F1: General Help F2: Previous Values F9: Optimized Defaults F10: Save and Exit ESC: Exit
Intel(R) Core(TM) i5-4402E CPU @ 1.60GHz		
CPU Signature	306c2	
CPU Speed	1600 MHz	
Processor Cores	2	
Intel HT Technology	Supported	
Intel VT-x Technology	Supported	
Intel SMX Technology	Not supported	
64-bit	Supported	
L1 Data Cache	32 KB x 2	
L1 Code Cache	32 KB x 2	
L2 Cache	256 KB x 2	
L3 Cache	3072 KB	
Hyper-threading	[Enabled]	
Active Processor Cores	[All]	
Limit CPUID Maximum	[Disabled]	
Execute Disable Bit	[Enabled]	
Intel Virtualization Technology	[Enabled]	
EIST	[Enabled]	

Version 2.15.1236. Copyright (C) 2012 American Megatrends, Inc.

Setting	Description
Hyper-threading	Enabled (default) for Windows XP and Linux (OS optimized for Hyper-Threading Technology) and Disabled for other OS (OS not optimized or Hyper-Threading Technology). When Disabled only one thread per enabled core is enabled.
Active Processor Cores	Number of cores to enable in each processor package. ► Options: All (default) and 1
Limit CPUID Maximum	Disabled for Windows XP ► Options: Enabled or Disabled (default)
Execute Disable Bit	XD can prevent certain classes of malicious buffer overflow attacks when combined with a supporting OS (Windows Server 2003 SP1, Windows XP SP2, SuSE Linux 9.2, RedHat Enterprise 3 Update 3.) ► Options: Enabled (default) or Disabled

Intel Virtualization Technology	When enabled, a VMM can utilize the additional hardware capabilities provided by Vanderpool Technology ► Options: Enabled (default) or Disabled
EIST	Enable (default)/ Disable Intel SpeedStep

4.2.3 SATA Configuration

Setting	Description
SATA Controller(s)	Enable (default) or disable SATA Device.
SATA Mode Selection	Determines how SATA controller(s) operate. ► Options: IDE , AHCI (default) or RAID
SATA Controller Speed	Indicates the maximum speed the SATA controller can support. ► Options: Default (default), Gen1 , Gen2 , Gen3
Port 0/1/2/3	Enable (default) or disable SATA Port.

SATA Device Type	Identify the SATA port is connected to Solid State Drive or Hard Disk Drive (default).
Spin Up Device	On an edge detect from 0 to 1, the PCH starts a COMRESET initialization sequence to the device. ▶ Options: Enabled or Disabled (default)

4.2.4 AMT Configuration

Setting	Description
Intel AMT	Enable (default)/ Disable Intel(R) Active Management Technology BIOS Extension. Note : iAMT H/W is always enabled. This option just controls the BIOS extension execution. If enabled, this requires additional firmware in the SPI device.

4.2.5 USB Configuration

Aptio Setup Utility - Copyright (C) 2012 American Megatrends, Inc.

Advanced

USB Configuration USB Devices: 1 Keyboard, 1 Mouse Legacy USB Support [Enabled] USB3.0 Support [Enabled]	Enables Legacy USB support. AUTO option disables legacy support if no USB devices are connected. DISABLE option will keep USB devices available only for EFI applications. →+: Select Screen ↓↑: Select Item Enter: Select +/-: Change Opt. F1: General Help F2: Previous Values F9: Optimized Defaults F10: Save and Exit ESC: Exit
--	---

Version 2.15.1236. Copyright (C) 2012 American Megatrends, Inc.

Setting	Description
Legacy USB Support	Enables (default) Legacy USB support. AUTO option disables legacy support if no USB devices are connected. DISABLE option will keep USB devices available only for EFI applications.
USB3.0 Support	Enable (default)/ Disable USB3.0 (XHCI) Controller support.

4.2.6 H/W Monitor

Aptio Setup Utility - Copyright (C) 2012 American Megatrends, Inc.

Advanced

PC Health Status	
CPU temperature1	: +62 °C
System temperature1	: +45 °C
CPU Speed	: N/A
VCC	: +3.448 V
VCORE	: +1.802 V
+5V	: +5.175 V
+1.05V	: +1.050 V

4.2.7 Super IO Configuration

Aptio Setup Utility - Copyright (C) 2012 American Megatrends, Inc.

Advanced

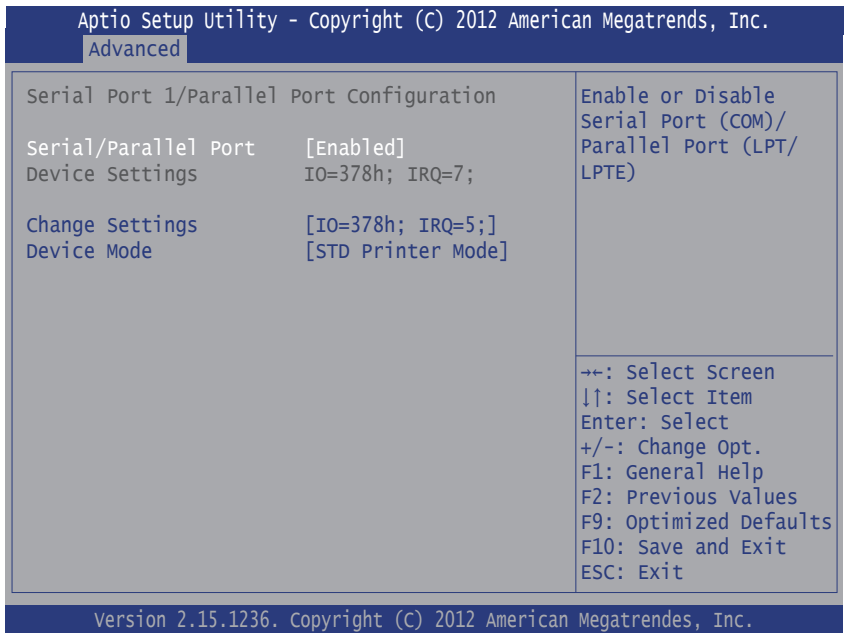

Super IO Configuration		Set Parameters of Serial Port 1
Super IO Chip	F71869E	
▶ Serial Port 1 Configuration		
▶ Serial Port 2 Configuration		
▶ Parallel Port Configuration		
Power On After Power Fail	[Power Off]	

→+: Select Screen
 ↓↑: Select Item
 Enter: select
 +/-: Change Opt.
 F1: General Help
 F2: Previous Values
 F9: Optimized Defaults
 F10: Save and Exit
 ESC: Exit

Version 2.15.1226. Copyright (C) 2012 American Megatrends, Inc.

Setting	Description
Serial Port 1 Configuration	
Serial Port 2 Configuration	See next page.
Parallel Port Configuration	
Power On After Power Fail	Specify what state to go to when power is re-applied after a power failure. ▶ Options: Last State , Power On and Power Off (default)

Serial Port 1~2/ Parallel Port Configuration

Setting	Description
Serial Port	Enable (default) or Disable Serial Port (COM).
Parallel Port	Enable (default) or Disable Parallel Port (LPT/LPTE).
Change Settings	Select an optimal setting for Super IO device. ▶ Options: IO=3F8h; IRQ=4 (default for Serial Port 1); IO=2F8h; IRQ=3 (default for Serial Port 2); IO=378h; IRQ=5 (default for Parallel Port); Auto; IO=378h; IRQ=5, 6, 7, 9, 10, 11, 12; IO=278h; IRQ=5, 6, 7, 9, 10, 11, 12; IO=3BCh; IRQ=5, 6, 7, 9, 10, 11, 12;
Device Mode (only for Parallel Port Configuration)	Change the Printer Port mode. ▶ Options: STD Printer Mode (default), SPP Mode , EPP-1.9 and SPP Mode , EPP-1.7 and SPP Mode , ECP Mode , ECP and EPP 1.9 Mode , ECP and EPP 1.7 Mode .

4.2.8 Intel(R) Ethernet Network Connect

Setting	Description
NIC Configuration	See next page.
Blink LEDs (range 0-15 seconds)	Blink LEDs for the specified duration (up to 15 seconds).
Link Status	Link Status

NIC Configuration

Aptio Setup Utility - Copyright (C) 2012 American Megatrends, Inc.

Advanced

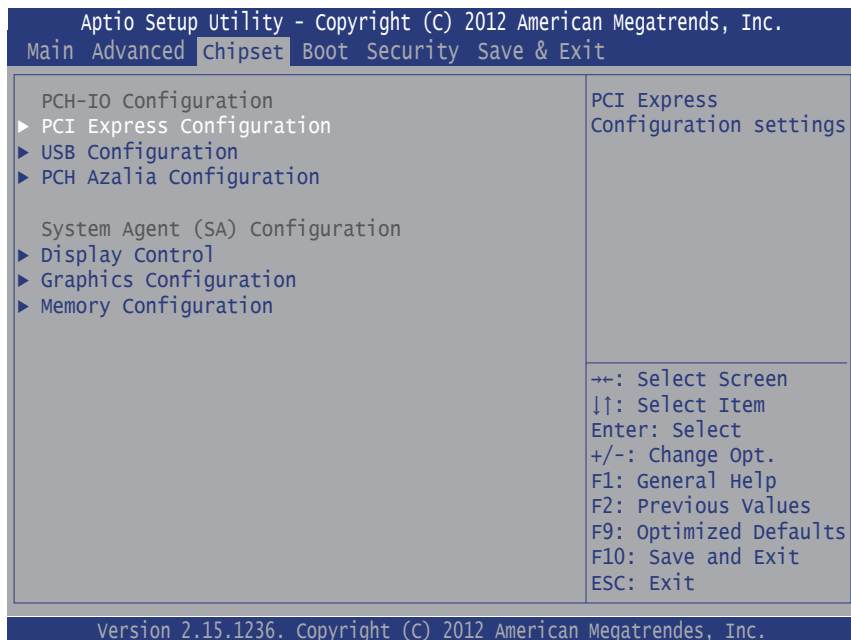

Link Speed	[AutoNeg]	Change link speed and duplex for current port.
Wake on LAN	[Enabled]	

++: Select Screen
 | |: Select Item
 Enter: Select
 +/-: Change Opt.
 F1: General Help
 F2: Previous Values
 F9: Optimized Defaults
 F10: Save and Exit
 ESC: Exit

Version 2.15.1236. Copyright (C) 2012 American Megatrends, Inc.

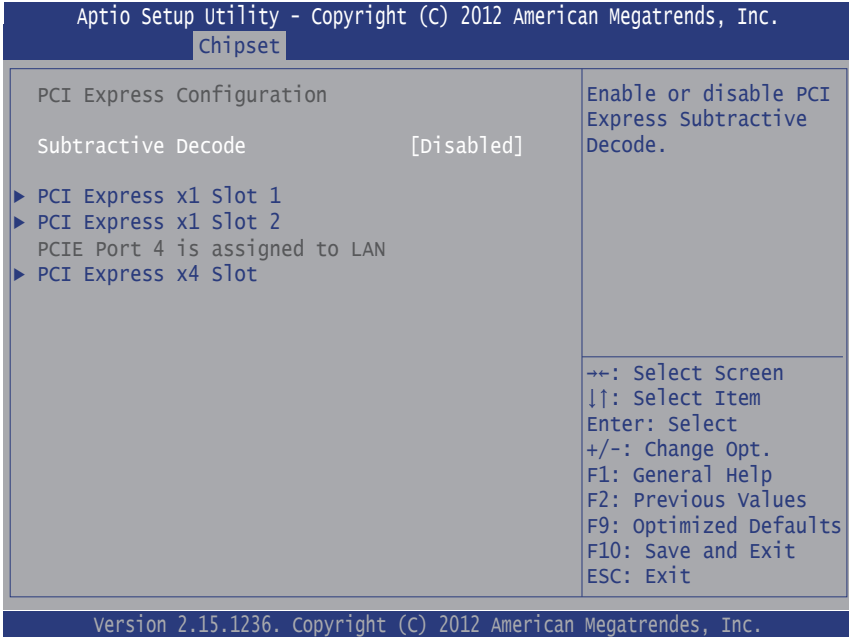

Setting	Description
Link Speed	Change link speed and duplex for current port. ► Options: AutoNeg (default), 10 Mbps Half , 10 Mbps Full , 100 Mbps Half , 100 Mbps Full
Wake on LAN	Enable this option to wake the system with a magic packet. ► Options: Enabled (default) or Disabled

4.3 Chipset

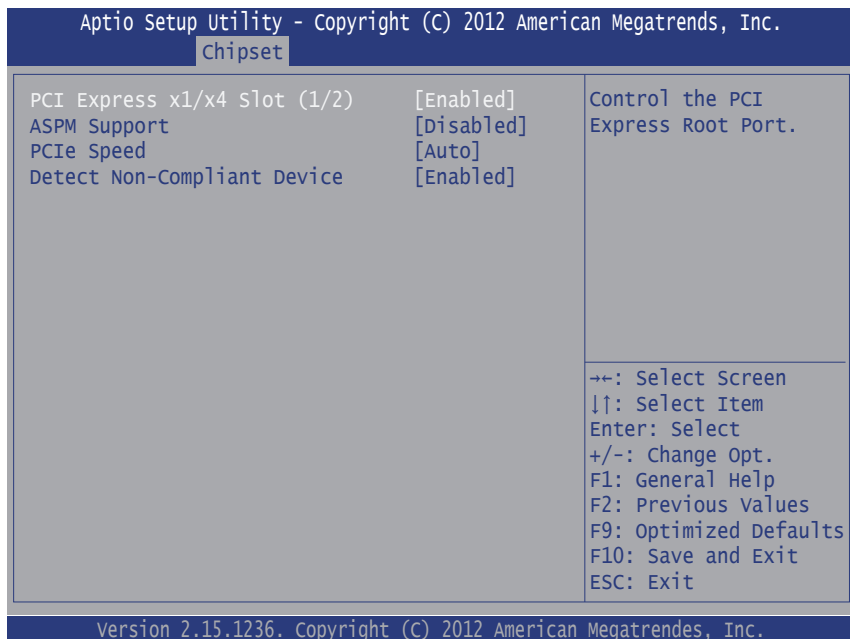

Setting	Description
PCI Express Configuration	See Section 4.3.1 PCI Express Configuration on page 34
USB Configuration	See Section 4.3.2 USB Configuration on page 36
PCH Azalia Configuration	See Section 4.3.3 PCH Azalia Configuration on page 37
Display Control	See Section 4.3.4 Display Control on page 38
Graphics Configuration	See Section 4.3.5 Graphics Configuration on page 39
Memory Configuration	See Section 4.3.6 Memory Configuration on page 40

4.3.1 PCI Express Configuration

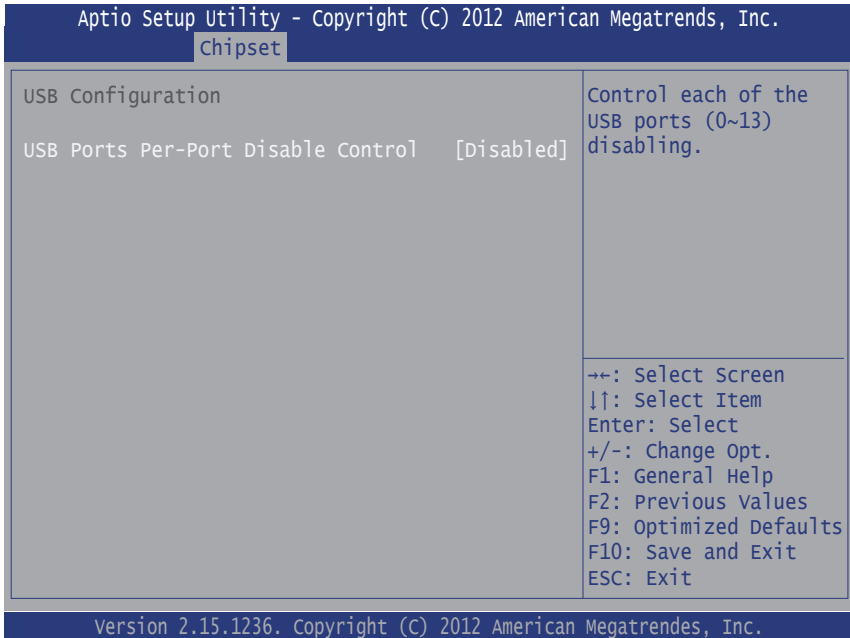

Setting	Description
Subtractive Decode	Enable or disable (default) PCI Express Subtractive Decode.
PCI Express x1 Slot 1	See next page.
PCI Express x1 Slot 2	
PCI Express x4 Slot	

PCI Express x1/x4 Slot (1/2)

Setting	Description
PCI Express x1 Slot 1	Control the PCI Express Root Port. ▶ Options: Enabled (default) or Disabled
PCI Express x1 Slot 2	
PCI Express x4 Slot	
ASPM Support	Set the ASPM Level: Force L0s - Force all links to L0s State: Auto - BIOS auto configure: DISABLE - Disable ASPM ▶ Options: Disabled (default), L0s , L1 , L0sL1 and Auto
PCIe Speed	Select PCI Express port speed. ▶ Options: Auto (default), Gen1 and Gen2
Detect Non-Compliant Device	Detect Non-Compliance PCI Express Device. If enabled, it will take more time at POST time. ▶ Options: Enabled (default) or Disabled

4.3.2 USB Configuration

Setting	Description
USB Ports Per-Port Disable Control	Control each of the USB ports (0~13) disabling. ► Options: Enabled or Disabled (default)

4.3.3 PCH Azalia Configuration

Aptio Setup Utility - Copyright (C) 2012 American Megatrends, Inc.

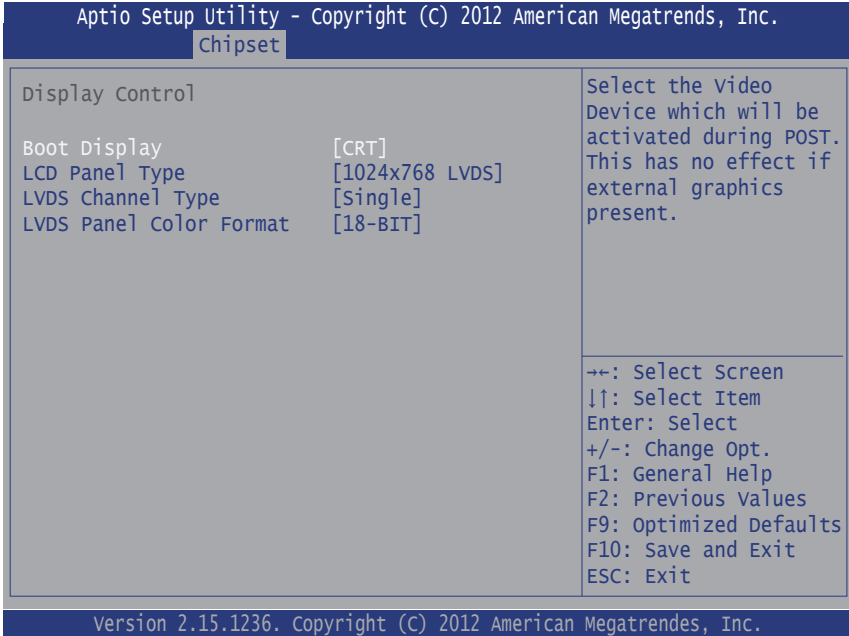

Chipset

PCH Azalia Configuration		Control Detection of the Azalia device. Disabled = Azalia will be unconditionally disabled Enabled = Azalia will be unconditionally Enabled Auto = Azalia will be enabled if present, disabled otherwise. →←: Select Screen ↓↑: Select Item Enter: Select +/-: Change Opt. F1: General Help F2: Previous Values F9: Optimized Defaults F10: Save and Exit ESC: Exit
Azalia	[Enabled]	

Version 2.15.1236. Copyright (C) 2012 American Megatrends, Inc.

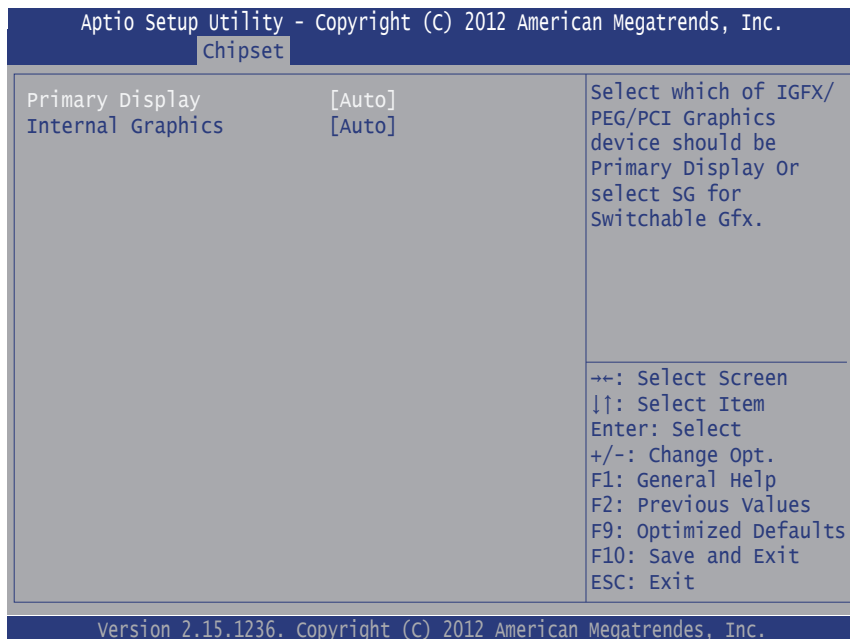

Setting	Description
Azalia	Control Detection of the Azalia device. Disabled = Azalia will be unconditionally disabled Enabled (default) = Azalia will be unconditionally Enabled Auto = Azalia will be enabled if present, disabled otherwise.

4.3.4 Display Control

Setting	Description
Boot Display	Select the Video Device which will be activated during POST. This has no effect if external graphics present. ▶ Options: CRT (default), LVDS , DVI , DigitalPort1 and DigitalPort2
LCD Panel Type	Select LCD panel used by Internal Graphics Device by selecting the appropriate setup item. ▶ Options: VBIOS Default , 640x480/800x600/1024x768 (default)/ 1280x1024/1400x1050/1600x1200/1366x768/1680x1050/1920x1200/1440x900/1600x900/1024x768/1280x800/1920x1080/2048x1536 LVDS
LVDS Channel Type	Select single (default) or dual channel
LVDS Panel Color Format	Select LVDS color display mode ▶ Options: 24-BIT or 18-BIT (default)

4.3.5 Graphics Configuration

Setting	Description
Primary Display	Select which of IGFX/PEG/PCI Graphics device should be Primary Display Or select SG for Switchable Gfx. ▶ Options: Auto (default), IGFX , PEG and PCIE
Internal Graphics	Keep IGD enabled based on the setup options. ▶ Options: Auto (default), Disabled and Enabled

4.3.6 Memory Configuration

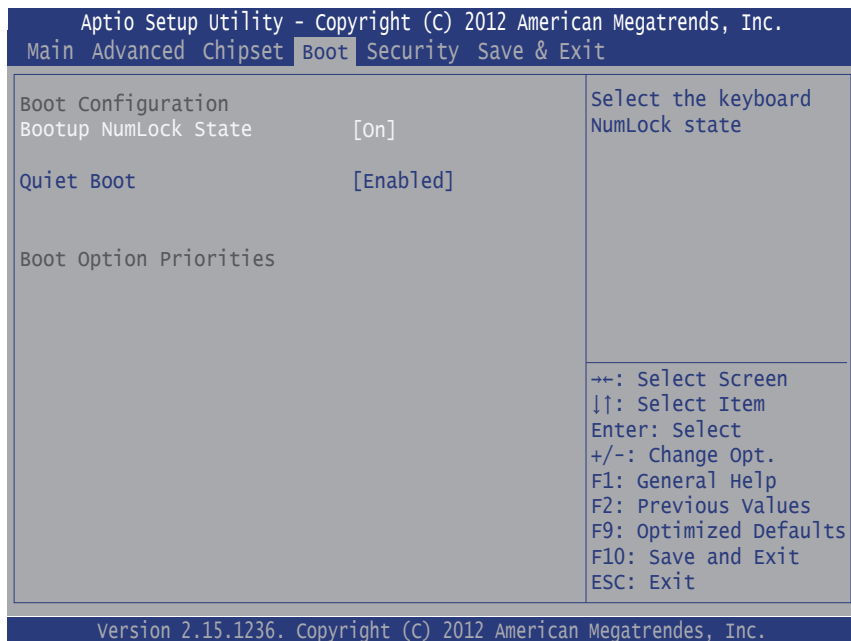

Aptio Setup Utility - Copyright (C) 2012 American Megatrends, Inc.

Chipset

Memory Information		
Memory RC Version	1.4.0.3	
Memory Frequency	1600 Mhz	
Total Memory	16384 MB (DDR3)	
Memory Voltage	1.35v	
DIMM#1	8192 MB (DDR3)	
DIMM#2	8192 MB (DDR3)	
CAS Latency (tCL)	11	
Minimum delay time		
CAS to RAS (tRCDmin)	11	
Row Precharge (tRPmin)	11	
Active to Precharge (tRASmin)	28	
		→+: Select Screen ↓↑: Select Item Enter: Select +/-: Change Opt. F1: General Help F2: Previous Values F9: Optimized Defaults F10: Save and Exit ESC: Exit

Version 2.15.1236. Copyright (C) 2012 American Megatrends, Inc.

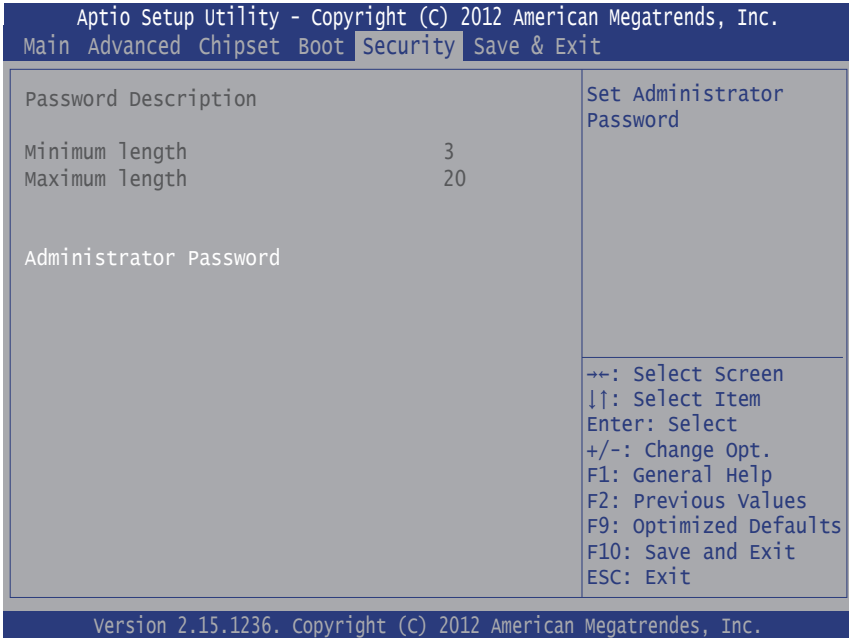

4.4 Boot

Setting	Description
Boot NumLock State	Select the keyboard NumLock state. ► Options: On (default) and Off .
Quiet Boot	Enables (default) or Disables Quiet Boot option.

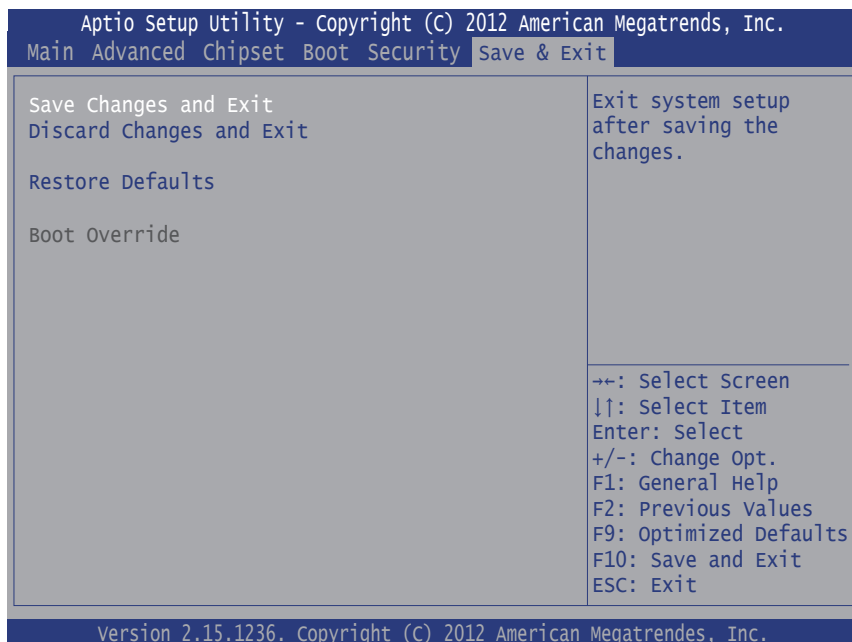

4.5 Security

The **Security** menu sets up the administrator password.

Setting	Description
Administrator Password	<p>To set up an administrator password:</p> <ol style="list-style-type: none"> 1. Select Administrator Password. The screen then pops up an Create New Password dialog. 2. Enter your desired password that is no less than 3 characters and no more than 20 characters. 3. Hit [Enter] key to submit.

4.6 Save & Exit

Setting	Description
Save Changes and Exit	Exit system setup after saving the changes. ▶ Enter the item and then a dialog box pops up: Save configuration and exit? (Yes/ No)
Discard Changes and Exit	Exit system setup without saving the changes. ▶ Enter the item and then a dialog box pops up: Quit without saving? (Yes/ No)
Restore Defaults	Restore/Load Default values for all the setup options. ▶ Enter the item and then a dialog box pops up: Load Optimized Defaults? (Yes/ No)

This page is intentionally left blank.

Appendix

Appendix A: I/O Port Address Map

Each peripheral device in the system is assigned a set of I/O port addresses which also becomes the identity of the device. The following table lists the I/O port addresses used.

Address	Device Description
0x00001854-0x00001857	Motherboard resources
0x00000020-0x00000021	Programmable interrupt controller
0x00000024-0x00000025	Programmable interrupt controller
0x00000028-0x00000029	Programmable interrupt controller
0x0000002C-0x0000002D	Programmable interrupt controller
0x00000030-0x00000031	Programmable interrupt controller
0x00000034-0x00000035	Programmable interrupt controller
0x00000038-0x00000039	Programmable interrupt controller
0x0000003C-0x0000003D	Programmable interrupt controller
0x000000A0-0x000000A1	Programmable interrupt controller
0x000000A4-0x000000A5	Programmable interrupt controller
0x000000A8-0x000000A9	Programmable interrupt controller
0x000000AC-0x000000AD	Programmable interrupt controller
0x000000B0-0x000000B1	Programmable interrupt controller
0x000000B4-0x000000B5	Programmable interrupt controller
0x000000B8-0x000000B9	Programmable interrupt controller
0x000000BC-0x000000BD	Programmable interrupt controller
0x000004D0-0x000004D1	Programmable interrupt controller
0x000004D0-0x000004D1	Motherboard resources
0x00000040-0x00000043	System timer
0x00000050-0x00000053	System timer
0x0000F000-0x0000F03F	Intel(R) HD Graphics 4600
0x000003B0-0x000003BB	Intel(R) HD Graphics 4600
0x000003C0-0x000003DF	Intel(R) HD Graphics 4600
0x00000000-0x0000001F	Direct memory access controller
0x00000000-0x0000001F	PCI bus
0x00000081-0x00000091	Direct memory access controller

0x00000093-0x0000009F	Direct memory access controller
0x000000C0-0x000000DF	Direct memory access controller
0x0000F040-0x0000F05F	Intel(R) 8 Series/C220 Series SMBus Controller - 8C22
0x00000060-0x00000060	Standard PS / 2 Keyboard
0x00000064-0x00000064	Standard PS / 2 Keyboard
0x00000378-0x0000037F	Printer Port (LPT1)
0x000003F8-0x000003FF	Communications Port (COM1)
0x000002F8-0x000002FF	Communications Port (COM2)
0x00000D00-0x0000FFFF	PCI bus
0x00000070-0x00000077	System CMOS/real time clock
0x00000070-0x00000077	Motherboard resources
0x00000010-0x0000001F	Motherboard resources
0x00000022-0x0000003F	Motherboard resources
0x00000044-0x0000005F	Motherboard resources
0x00000072-0x0000007F	Motherboard resources
0x00000080-0x00000080	Motherboard resources
0x00000080-0x00000080	Motherboard resources
0x00000084-0x00000086	Motherboard resources
0x00000088-0x00000088	Motherboard resources
0x0000008C-0x0000008E	Motherboard resources
0x00000090-0x0000009F	Motherboard resources
0x000000A2-0x000000BF	Motherboard resources
0x000000E0-0x000000EF	Motherboard resources
0x00000A00-0x00000A1F	Motherboard resources
0x00000290-0x0000029F	Motherboard resources
0x0000002E-0x0000002F	Motherboard resources
0x0000004E-0x0000004F	Motherboard resources
0x00000061-0x00000061	Motherboard resources
0x00000063-0x00000063	Motherboard resources
0x00000065-0x00000065	Motherboard resources
0x00000067-0x00000067	Motherboard resources

Appendix

0x00000092-0x00000092	Motherboard resources

Appendix C: Interrupt Request Lines (IRQ)

Peripheral devices use interrupt request lines to notify CPU for the service required. The following table shows the IRQ used by the devices on board.

Level	Function
IRQ 0	System timer
IRQ 1	Standard PS / 2 Keyboard
IRQ 3	Communications Port (COM2)
IRQ 4	Communications Port (COM1)
IRQ 8	System CMOS/real time clock
IRQ 10	Intel(R) 8 Series/C220 Series SMBus Controller - 8C22
IRQ 12	Microsoft PS/2 Mouse
IRQ 13	Numeric data processor

Appendix D: Watchdog Timer (WDT) Setting

WDT is widely used for industry application to monitor the activity of CPU. Application software depends on its requirement to trigger WDT with adequate timer setting. Before WDT time out, the functional normal system will reload the WDT. The WDT never time out for a normal system. The WDT will not be reloaded by an abnormal system, then WDT will time out and reset the system automatically to avoid abnormal operation.

This board supports 255 levels watchdog timer by software programming I/O ports. Below are the source codes written in C, please take them as WDT application example.

```

/*----- Include Header Area -----*/
#include "math.h"
#include "stdio.h"
#include "dos.h"

#define    DELAY_TIME                10

int SMB_PORT_AD    = 0xF040;
