Regulatory Compliance

FCC-A Radio Frequency Interference Statement

This equipment has been tested and found to comply with the limits for a class A digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference, in which case the user will be required to correct the interference at his personal expense.

Notice 1

The changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Notice 2

Shielded interface cables and A.C. power cord, if any, must be used in order to comply with the emission limits.

FOR HOME OR OFFICE USE

Battery Recycling and Disposal

Only use the appropriate battery specified for this product.
Do not re-use, recharge, or reheat an old battery.
Do not attempt to force open the battery.
Do not discard used batteries with regular trash.
Discard used batteries according to local regulations.

Safety Precautions

Do's
- o Always read the safety instructions carefully.
- o Keep this User's Manual for future reference.
- o All cautions and warnings on the equipment should be noted.
- o Keep this equipment away from humidity.
- o Lay this equipment on a reliable flat surface before setting it up.
- o Make sure the voltage of the power source and adjust properly 110/220V before connecting the equipment to the power inlet.
- o Place the power cord in such a way that people cannot step on it.
- o Always unplug the power cord before inserting any add-on card or module.
- o If any of the following situations arises, get the equipment checked by authorized service personnel:
  - o The power cord or plug is damaged.
  - o Liquid has penetrated into the equipment.
  - o The equipment has been exposed to moisture.
  - o The equipment has not worked well or you cannot get it work according to User's Manual.
  - o The equipment has dropped and damaged.
  - o The equipment has obvious sign of breakage.

Don'ts
- o Do not leave this equipment in an environment unconditioned or in a storage temperature above 70°C (158°F). The equipment may be damaged.
- o Do not leave this equipment in direct sunlight.
- o Never pour any liquid into the opening. Liquid can cause damage or electrical shock.
- o Do not place anything over the power cord.
- o Do not cover the ventilation holes. The openings on the enclosure protect the equipment from overheating

Box Contents

- ☐ 1 x EPIA-P720 Pico-ITX mainboard
- ☐ 1 x P720-A I/O module board
- ☐ 1 x SATA cable
- ☐ 1 x SATA power cable
- ☐ 1 x DC-In cable

TABLE OF CONTENTS

1

Product Overview

The VIA EPIA-P720 is an ultra-compact and highly integrated Pico-ITX mainboard and the smallest stand-alone form-factor available today. Through a high level of integration, the Pico-ITX form factor is 75% smaller than the existing Mini-ITX form factor. The mainboard enables the creation of an exciting new generation of small, ergonomic, innovative and affordable embedded systems.

The VIA EPIA-P720 Pico-ITX mainboard is rich in I/O integration and comes with an integrated VIA Eden ULV 1.0GHz NanoBGA2 processor, boasting of ultra-low power consumption and cool operation.

KEY COMPONENTS

VIA Eden ULV 1.0GHz NanoBGA2 Processor

Due to its ultra cool, ultra quiet, and reliable performance, the VIA Eden ULV 1.0GHz NanoBGA2 processor is a perfect fit for thin client, set top boxes, silent desktop. With a maximum power envelope of 3.5W, the VIA Eden ULV 1.0GHz NanoBGA2 processor offers impressive power efficiency and highly effective heat dissipation all within an ultra compact NanoBGA2 package measuring just 21mm x 21mm. When combined with the most recent VIA VX855 Media System Processor (MSP), which have been designed as companion sets for the latest VIA processors, system developers can utilize an impressive range of features for a wide range of desktop and embedded applications.

VIA VX855 Media System Processor

The VIA VX855 MSP integrates a premium graphics engine, an HD audio controller, a DDR2 memory controller, a 400MHz FSB processor interface, and extensive I/O capabilities support in a single chip design. Complementing the power-efficient VIA Eden ULV 1.0GHz NanoBGA2 processor, the VX855 is based on a highly sophisticated power efficient architecture that enables such rich integration into a compact package with a maximum power envelope of just 2.3 W.

MAINBOARD SPECIFICATIONS

CPU VIA Eden ULV 1.0 GHz NanoBGA2 processor
- NanoBGA2 package
- 400 MHz Front Side Bus

Chipset VIA VX855 All-in-One System Processor

Graphics Integrated VIA Chrome9^{TM} HCM DX9 with MPEG-2 Accelerators

System Memory One DDR2 800/667 SODIMM slot (up to 2 GB)

Onboard Storage One UltraDMA 133/100/66/33 44-pin IDE connector
One SATA 3Gb/s connector

Audio VIA VT1708B High Definition Audio Codec

LAN One VIA VT6122 Gigabit Ethernet controller

Onboard I/O Connectors One Audio pin connector for Line-out, Line-in and Mic-in
One Single-channel LVDS connector (5V/3V)
One LPC pin connector
One SMBus pin connector
One DIO pin connector(4 GPI & 4 GPO)
Two UART port
One SYS fan connector
One PS2 mouse/keyboard pin header
One USB pin header
One Front panel pin header
One Backlight control pin header
One SATA power connector
One +12V DC-in 2-pin connector

I/O Ports One HDMI® port
One VGA port
One GigaLAN port
Two USB ports

System Monitoring and Management Wake-On-LAN and Keyboard Power-on
RTC Timer
Watch Dog Timer
System power management, AC power failure

BIOS AMI BIOS with 4Mbit LPC flash memory

Operating System Windows XP/Windows CE/Windows XPe and Linux

Operating Environment Temperature: 0°C up to 60°C
Humidity: 0% ~ 95% (relative humidity; non-condensing)

Compliance CE/FCC/BSMI/RoHS

Dimensions 135 mm(w) x 45 mm(H) x 131 mm (D)

Form Factor Pico-ITX
10 cm x 7.2 cm

DEVELOPMENT KIT ACCESSORIES

DC-In Cable

The DC-In power cable provides a means to connect to the power brick.

Power Brick

The power brick provides a regulated 12V/5A output to power up the EPIA-P720 mainboard.

DC-in cable
Power brick

Note:
The Power brick is not included in the package of EPIA-P720 and this item should be purchased separately.

2

Onboard Connectors, Slots and Pin Headers

This chapter provides you with information about hardware installation procedures. It is recommended to use a grounded wrist strap before handling computer components. Electrostatic discharge (ESD) can damage some components.

TOP SIDE CONNECTORS

VIA Eden ULV 1.0GHz with a Fanless Heatsink

The VIA EPIA-P720 Pico-ITX mainboard is packaged with a standard VIA Eden ULV 1.0GHz NanoBGA2 processor. The processor does not require a heatsink with fan because of it highly power efficient and ultra cool performance.
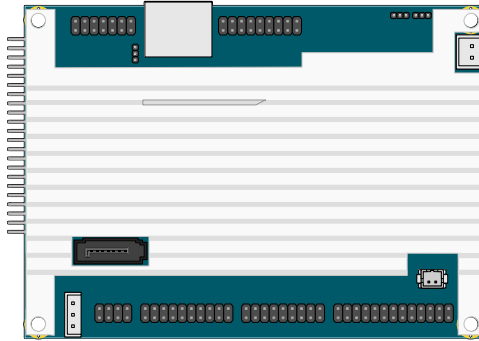

System Fan connector: FAN1

FAN1 runs on +5V and maintains system cooling. When connecting the cable to the connector, always be aware that the red wire (positive wire) should be connected to the +5V pin. The black wire is the ground wire and should always be connected to GND.

Pin	Signal
1	+5V
2	GND
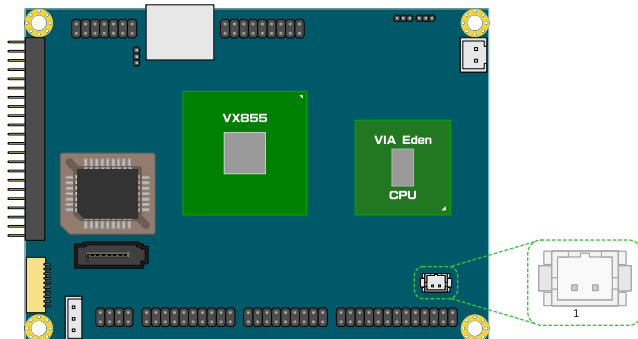

DC-In Power connector: PWR1

EPIA-P720 has an onboard DC-In 2-pin power connector to connect the DC-In power cable.

Pin	Signal
1	DC In (+12V)
2	GND
Serial ATA Power connector: PWR2

The mainboard supports a 3-pin SATA power connector for SATA power cable. Plug the SATA power cable into the SATA power connector. Make sure the power plug is inserted in the proper orientation and pins are aligned.

Pin	Signal
1	+5V
2	+12V
3	GND
Serial ATA connector: SATA1

The current SATA interface allows a data transfer rate of up to 300 MB/s — approximately 225% faster than Ultra DMA parallel ATA.
HDMI® port connector: HDMI1

The mainboard has a High Definition Multimedia Interface port for connecting to high definition video and digital audio. The HDMI® port allows you to connect digital video devices which utilize a high definition video signal. The HDMI® port is HDCP 1.2 compatible.
Note:
CEC feature is not supported.

IDE pin header: IDE1

The mainboard has an Ultra DMA 133/100 controller. You can connect up to two IDE devices in any combination.

Pin	Signal	Pin	Signal
1	-IDERST	2	GND
3	PDD7	4	PDD8
5	PDD6	6	PDD9
7	PDD5	8	PDD10
9	PDD4	10	PDD11
11	PDD3	12	PDD12
13	PDD0	14	PDD13
15	PDD1	16	PDD14
17	PDD2	18	PDD15
19	GND	20	KEY
21	PDDREQ	22	GND
23	PDDIOW	24	GND
25	PDDIOR	26	GND
27	PIORDY	28	GND
29	PDDACK	30	GND
31	-IRQ14	32	NC
33	PDA1	34	PDIAG
35	PDA0	36	PDA2
37	PDCS1	38	PDCS3
39	-HD_LED1	40	GND
41	+5V	42	+5V
43	GND	44	NC
Ethernet LAN pin header: CN3

The Ethernet LAN pin header is for connecting to the P720-A I/O module.

Pin	Signal	Pin	Signal
1	A3V3GL(+3.3V)	2	+3.3VSUS
3	TXNC	4	TXND
5	TXPC	6	TXPD
7	TXNA	8	TXNB
9	TXPA	10	TXPB
11	GND	12	LED1
13	LED2	14	LINK ACT
VGA and USB pin header: VGA_USB1

The VGA and USB pin header is for connecting to the P720-A I/O module.

Pin	Signal	Pin	Signal
1	VGA_RED	2	+5V
3	VGA_GREEN	4	GND
5	VGA_BLUE	6	DDC_DATA
7	GND	8	DDC_CLK
9	+5VUSB_P	10	VGA_VS
11	VGA_HS	12	GND
13	+5VSUS	14	GND
15	USBHP0-	16	USBHP1-/USBDP_D-
17	USBHP0+	18	USBHP1+/USBDP_D+
Front Audio pin header: CN1

This pin header allows you to connect a front audio to the mainboard.

Pin	Signal	Pin	Signal
1	LINE IN_R	2	AUD_GND
3	LINE IN_L	4	MIC IN_L
5	LINE OUT_R	6	MIC IN_R
7	LINE OUT_L	8	JACK SENSE
USB pin header: CN2

This 20-pin USB pin header allows you to connect up to four USB2.0 ports.

Pin	Signal	Pin	Signal
1	GND	2	GND
3	GND	4	GND
5	USB VD2+	6	USB VD3+
7	USB VD2-	8	USB VD3-
9	+5VSUS	10	+5VSUS
11	USB VD5-	12	USB VD4-
13	USB VD5+	14	USB VD4+
15	reserved	16	reserved
17	reserved	18	reserved
19	reserved	20	reserved
Front Panel and PS/2 KBMS pin header: CN4

This single pin header allows you to connect the power switch, reset switch, power LED, HDD LED, case speaker and two PS/2 ports.

Pin	Signal	Pin	Signal
1	+PWR_LED	2	+HD_LED
3	+5VSUS (for LED use)	4	-HD_LED
5	GND	6	PW_SW
7	SPEAK_BZ	8	GND
9	GND	10	RST_SW
11	-PWR_LED	12	GND
13	+5VSUS	14	GND
15	KB_CLK	16	KB_DT
17	MS_CLK	18	MS_DT
Note:
Pins 1 to 12 are for Front Panel and pin 13 to 18 use for PS/2 KBMS.

LPC, SMBus and Digital I/O pin header: CN5

This single pin header allows the connection of LPC, SMBus devices and the Digital Input and Output.

Pin	Signal	Pin	Signal
1	GND	2	LAD3
3	SIOOSC	4	LAD2
5	LPCCLK	6	LAD1
7	-LDRQ1	8	-LFRAME
9	SERIRQ	10	LAD0
11	-SIOSMI/-PME	12	-PCIRST1
13	SMB_CLK	14	SMB_DAT
15	+5V	16	+3.3V
17	GPO5/CSTATE1	18	GPI8/-RING
19	GPO6/-C4PSTOP	20	GPI9/-THRM
21	GPIO0/SMBDT2	22	GPI5/-EXTSMI
23	GPIO1/SMBCK2	24	GPI4/-BATLOW
25	GND	26	GND
(Pin 11) Default: -SIOSMI

UART port 2: J1

UART offers TTL level serial signal for the user to easily convert to support RS232/RS422/RS485.

Pin	UART Signal
1	+5V
2	SIN_1
3	SOUT_1
4	DCD_1
5	RI_1
6	GND
7	DTR_1
8	CTS_1
9	RTS_1
10	DSR_1
(Pin 1) Default: 5V

BOTTOM SIDE CONNECTOR

UART port 1: J2

UART offers TTL level serial signal for the user to easily convert to support RS232/RS422/RS485.

Pin	UART Signal
1	GND
2	-LPCRST
3	-
4	CTS_0
5	RTS_0
6	DSR_0
7	DTR_0
8	SIN_0
9	SOUT_0
10	DCD_0
11	RI_0
12	+3.3V
(Pin 12) Default: 3.3V

LVDS Panel connector: LVDS1

The single-channel LVDS connector allows you to connect the panel's LVDS cable directly to support LVDS panel.

Pin	Signal	Pin	Signal
1	LVDSD0-	2	LVDSD1-
3	LVDSD0+	4	LVDSD1+
5	GND	6	GND
7	Panel_VDD	8	LVDSD2-
9	Panel_VDD	10	LVDSD2+
11	LCD1_DATA	12	GND
13	LCD1_CLK	14	LVDSCLK+
15	GND	16	LVDSCLK-
17	Back Light_VDD	18	GND
19	Back Light_VDD	20	LVDSD3-
21	BL_ENABLE	22	LVDSD3+
23	**DIMMING**	24	GND
Note:
Contact local distributor and FAE for special Video BIOS for 24bit LCD panel support.

(Pin 23) DIMMING: LVDS Backlight Brightness Voltage Control, 0V ~ 3.3V

Level 0: 0%   Level 3: 75%
Level 1: 25%   Level 4: 100%
Level 2: 50%

External Battery: BAT1

The mainboard comes with external CMOS battery connector. This 2-pin connector used to connect the external cable battery for CMOS.

Pin	Signal
1	+3.3VBAT
2	GND
Memory Module Installation

Memory Slot: SODIMM1

The VIA EPIA-P720 Pico-ITX mainboard has one 200-SODIMM slot for DDR2 667/533 SDRAM memory modules and supports memory sizes up to 2 GB.

SODIMM slot
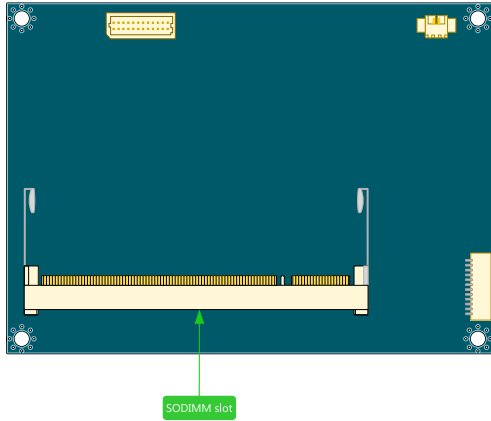

Available DDR2 SDRAM Configuration

Refer to the table below for available DDR2 SDRAM configurations on the mainboard.

Slot	Module Size	Total
SODIMM	64 MB, 128 MB, 256 MB, 512 MB, 1 GB, 2 GB	64 MB - 2 GB
Maximum supported system memory		2 GB

Installing the memory

Step 1
Locate the SODIMM slot in the mainboard and align the notch on the SODIMM with the memory slot.
Step 2
Insert the SODIMM module at a 45 degree angle. Then push the SODIMM down until it snaps into the locking mechanism.
PIN HEADER AND CONNECTOR VENDOR LISTS

3

Onboard Jumpers

Clear CMOS jumper: JM1

The onboard CMOS RAM stores system configuration data and has an onboard battery power supply. To reset the CMOS settings, set the jumper on pins 2 and 3 while the system is off. Return the jumper to pins 1 and 2 afterwards. Setting the jumper while the system is on will damage the mainboard. The default setting is on pins 1 and 2.

Setting	1	2	3
Normal Operation (default)	ON	ON	OFF
Clear CMOS setting	OFF	ON	ON
Caution:
Except when clearing the RTC RAM, never remove the cap from the CLEAR_CMOS jumper default position. Removing the cap will cause system boot failure. Avoid clearing the CMOS while the system is on; it will damage the mainboard.

LCD Panel Power Selector: JM2

This jumper determines the input voltage for the LCD connector.

Setting	1	2	3
+5V	ON	ON	OFF
+3.3V (default)	OFF	ON	ON
LCD Backlight Power Selector: JM3

This jumper determines the input voltage for the LCD backlight inverter.

Setting	1	2	3
+12V	ON	ON	OFF
+5V (default)	OFF	ON	ON
4

P720-A I/O Module Installation

P720-A INSTALLATION PROCEDURE

Step 1
Align and mount the P720-A board.
Step 2
Align the CON1 (VGA & USB board-to-board connector) and CON2 (LAN board-to-board connector) of P720-A I/O module board with the CN3 and VGA_USB1 pin headers to the top side of EPIA-P720 mainboard respectively.
Step 3

Then gently press down until the pins on the EPIA-P720 mainboard have been fully inserted into the CON1 and CON2 connectors of the P720-A I/O module board.
Step 4

Secure the EPIA-P720-A I/O module with two screws.
5

BIOS Setup

This chapter gives a detailed explanation of the BIOS setup functions.

ENTERING THE BIOS SETUP MENU

Power on the computer and press <**Delete**> during the beginning of the boot sequence to enter the BIOS setup menu. If you missed the BIOS setup entry point, restart the system and try again.

CONTROL KEYS

Keys	Description
Up	Move to the previous item
Down	Move to the next item
Left	Move to the previous tab
Right	Move to the next tab
Enter	Select the item
Esc	Jumps to the Exit menu or returns to the main menu from a submenu
+ (number pad)	Increase the numeric value
- (number pad)	Decrease the numeric value
F1	General help, only for Status Page Setup Menu and Option Page Setup Menu
F7	Discard Changes
F9	Load Optimized defaults
F10	Save all the changes and exit

GETTING HELP

The BIOS setup program provides a "**General Help**" screen. You can display this screen from any menu/sub-menu by pressing <**F1**>. The help screen displays the keys for using and navigating the BIOS setup. Press <**Esc**> to exit the help screen.

General ACPI Configuration

This menu contains ACPI (Advanced Configuration and Power
Management Interface) options.

Advanced ACPI Configuration

Chipset ACPI Configuration

GENERAL ACPI CONFIGURATION
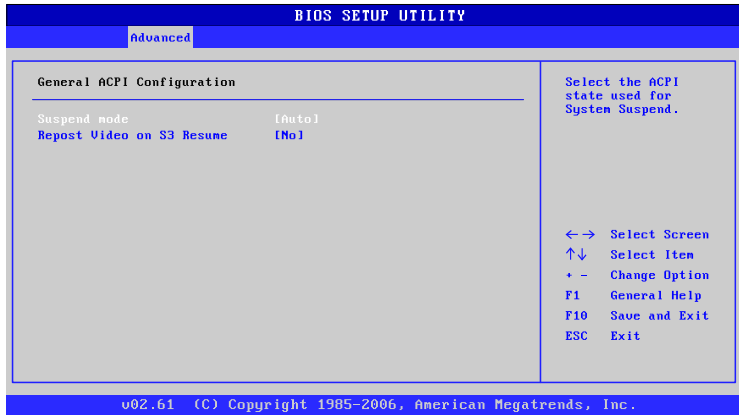

Suspend Mode
Select the ACPI state used for system suspend.

Settings	Description
S1(POS)	S1/Power On Suspend (POS) is a low power state. In this state, no system context (CPU or chipset) is lost and hardware maintains all system contexts
S3(STR)	S3/Suspend To RAM (STR) is a power-down state. In this state, power is supplied only to essential components such as main memory and wakeup-capable devices. The system context is saved to main memory, and context is restored from the memory when a "wakeup" event occurs.
Auto	Depends on the OS to select the state.

Repost Video on S3 Resume
To determine whether to invoke VGA BIOS post on S3/STR resume or not.

Settings: [No, Yes]

ADVANCED ACPI CONFIGURATION

Display Activity
Settings: [Ignore, Monitor]

Monitor IRQ3~15
Enables or disables the monitoring of the specified IRQ line.
Settings: [Ignore, Monitor]

Note:
IRQ (Interrupt Request) lines are system resources allocated to I/O devices. When an I/O device needs to gain attention of the operating system, it signals this by causing an IRQ to occur. After receiving the signal, when the operating system is ready, the system will interrupt itself and perform the service required by the IO device.

Resume on Ring

```

Change Supervisor Password

This option is for setting a password for entering BIOS Setup. When a password has been set, a password prompt will be displayed whenever BIOS Setup is run. This prevents an unauthorized person from changing any part of your system configuration.

When a supervisor password is used, the BIOS Setup program can be accessed and the BIOS settings can be changed.

Change User Password

When a user password is used, the BIOS Setup program can be accessed but the BIOS settings cannot be changed.

Boot Sector Virus Protection

Driver Installation

MICROSOFT DRIVER SUPPORT

The VIA EPIA-P720 mainboard is compatible with Microsoft operating systems. The latest Windows drivers can be downloaded from the VEPD website at www.viaembedded.com.

For embedded operating systems, the related drivers can be found in the VIA Embedded website at www.viaembedded.com.

LINUX DRIVER SUPPORT

The VIA EPIA- P720 mainboard is highly compatible with many Linux distributions.

Support and drivers are provided through various methods including:

1. Drivers provided by VIA

2. Using a driver built into a distribution package

3. Visiting www.viaembedded.com for the latest updated drivers

4. Installing a third party driver (such as the ALSA driver from the Advanced Linux Sound Architecture project for integrated audio)

For OEM clients and system integrators developing a product for long term production, other code and resources may also be made available. Contact VEPD to submit a request.
